If a product fails due to a manufacturing fault, Vitra will offer a free replacement or replacement parts. If a product is not available, Vitra will offer an alternative to the same value.

Every effort has been made to make the colours/finishes in this brochure as accurate as possible, however we cannot guarantee an exact match due to the printing process.

¹Replacement only for working parts - non transferable.

¹¹2-year guarantee on Move Shower System.

ICON GUIDE

WATER SAVING

VitrA water saving WCs, marked with this symbol, have a special bowl structure and are specifically designed to flush with both lower (2.5/4 litre) and typical (3/6 litre) water volumes. By using less water, whilst still delivering efficient flushing, these water saving WCs benefit you and the environment. All VitrA standard height wall-hung frames come with dual flushing function as standard in both 2.5/4 litre and 3/6 litre options.

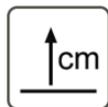

SPACE SAVING

A wall-hung WC takes up less room than a conventional WC, and the concealed installation offers flexibility in confined spaces. The range of compact WCs have shorter projection, saving even more space.

ACCESSIBLE

These products are wheelchair accessible and provide enhanced convenience in the bathroom.

COMFORT HEIGHT

These WC pans are taller than regular pans for added comfort and ease of use.

FISCHER

A simple, elegant installation system for use with wall-hung WCs. The fixings are hidden from sight by the use of internal ABS sleeves, creating a clean, smooth design.

WASHBASIN FORMS

Washbasins can be used with a pedestal as well as being wall-hung. Basins suitable for use with a countertop can be fitted in three alternative ways:

RIM-EX TECHNOLOGY

Offering effortless cleaning and innovative, hygienic design. VitrA's rimless WC pan eliminates the areas where germs gather and multiply, giving a superior level of hygiene.

WRAS

The purpose of WRAS is to contribute to the protection of public health by preventing contamination of public water supplies and encouraging the efficient use of water by promoting and facilitating compliance with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

INNOVATION AND CREATIVITY

Vitra's Innovation Centre – where all the magic happens, from the conception, development and realisation of original ideas and designs, to the innovation, planning and production of new technology and materials.

Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends culture, art and lifestyle.

Architects and designers are encouraged to free their imaginations

It's this commitment to innovation and creativity, to constantly improve comfort, sustainability and bathroom aesthetics, that is helping us transform the traditional concept of the bathroom.

THE ESSENCE OF VITRA

A HISTORY OF INGENUITY

Vitra's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in Izmir. Three decades later, his son, Dr Nejat Eczacıbaşı, took the family business a step further by establishing a pharmaceutical

laboratory in Istanbul. The business continued to grow steadily, and by 1952 he had opened Turkey's first modern pharmaceutical plant. Within a few years, Eczacıbaşı's vision had grown further still, with the establishment of Turkey's first ceramic sanitaryware plant in 1958. The Vitra brand was adopted in 1966.

Five decades after the renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products, Turkey's first ceramic sanitaryware plant was established.

Pictured: Dr. Nejat Eczacıbaşı

INTERNATIONAL RECOGNITION

Vitra's successful relationships with international designers have resulted in many accolades for the company.

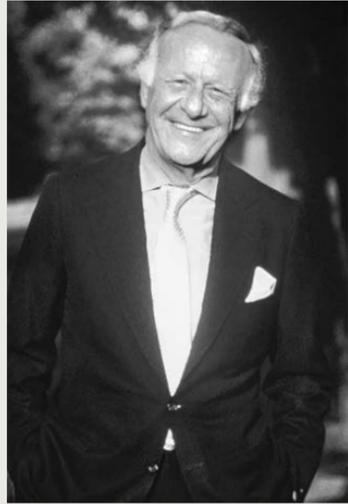

This includes the Wallpaper Design Award for Best Bathroom, an Elle Décor Award, Good Design Award, Red Dot Design Award and no fewer than three iF product design awards for excellence in product and design quality.

AN INTERNATIONAL BRAND, VITRA PRODUCES OVER FIVE MILLION PIECES OF SANITARYWARE PER YEAR AND EXPORTS TO 75 COUNTRIES WORLDWIDE

EVOLUTION OF THE VITRA BRAND

Süleyman Ferit Bey, Dr. Nejat Eczacıbaşı's father, is given the title of "Eczacıbaşı".

Dr. Nejat Eczacıbaşı establishes a pharmaceutical laboratory in Istanbul. His first product is a vitamin capsule.

Eczacıbaşı opens Turkey's first production plant for ceramic sanitaryware.

The Vitra brand was first adopted.

The group opened its first brassware plant within its Bozüyük mega complex.

Production of acrylic bathtubs and ceramic tiles began at the Tuzla plant.

Start of a \$45.4m investment in the production plant at the Bozüyük complex to increase capacity by a further 20%.

V-Care is launched – the new generation of shower toilet.

Vitra opens its first sales and marketing offices outside of Turkey. Vitra Bad (Germany) and Vitra UK Ltd.

The Eczacıbaşı Building Products Division assembles all its R&D teams under one roof with the opening of the Vitra Innovation Centre at Bozüyük.

1909 1912 1942 1952 1958 1966 1977 1979 1983 1991 1992 1996 2011 2014 2015 TODAY

Eczacıbaşı inaugurates the first Turkish modern pharmaceutical plant in Istanbul.

Süleyman Ferit Bey buys the Sifa Pharmacy in Izmir and begins producing toothpaste, lotions and creams.

The Eczacıbaşı Group's first ceramic factory in Bozüyük began production (over time this grew to become the Bozüyük mega complex).

The first ceramic sanitaryware exports began.

Eczacıbaşı invests in a second sanitaryware and ceramic tiles production line at the Bozüyük Building Products Complex. With this investment, Vitra has one of the world's largest ceramic sanitaryware production facilities.

Vitra is an international brand, producing over five million pieces of sanitaryware per year and exporting to 75 countries worldwide.

Istanbul range receives the Design Classic award by Pro Publishing.

INNOVATION

VITRUS

The Vitrus glass cistern and frame from VitrA stands out with its elegant design and offers an alternative solution for stylish bathrooms.

Easy to install, with a large cover opening allowing ease of maintenance. With two colour choices of black and white, the Vitrus glass cistern and frame is a unique solution to update your bathroom with either a wall-hung or back-to-wall WC without having to create a false wall to hide the cistern. Vitrus is compatible with all VitrA wall-hung and back-to-wall WCs.

For more information, please see page 192.

Toilet brush and WCs not available

Please refer to page 192 for full product range and technical drawings

A UNIQUE SOLUTION AVAILABLE
IN BLACK AND WHITE

VITRA RIM-EX™

VitrA's rimless WC pan technology removes one of the most unhygienic aspects of traditional WC design, where hard-to-clean rims can harbour germs and allow them to multiply unchecked.

The unique design of our Rim-ex pans incorporates a water diverter to direct the flush around the bowl, which can be removed easily for cleaning. Rim-ex is 95% more hygienic than standard WC pans.*

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The redesigned bowl features a smooth, channel-free design to discourage germ reproduction and provide superior hygiene.

RIM-EX™
WC pan

RIM-EX RANGES

The S20, S50 and Zentrum suites offer a Rim-ex option.

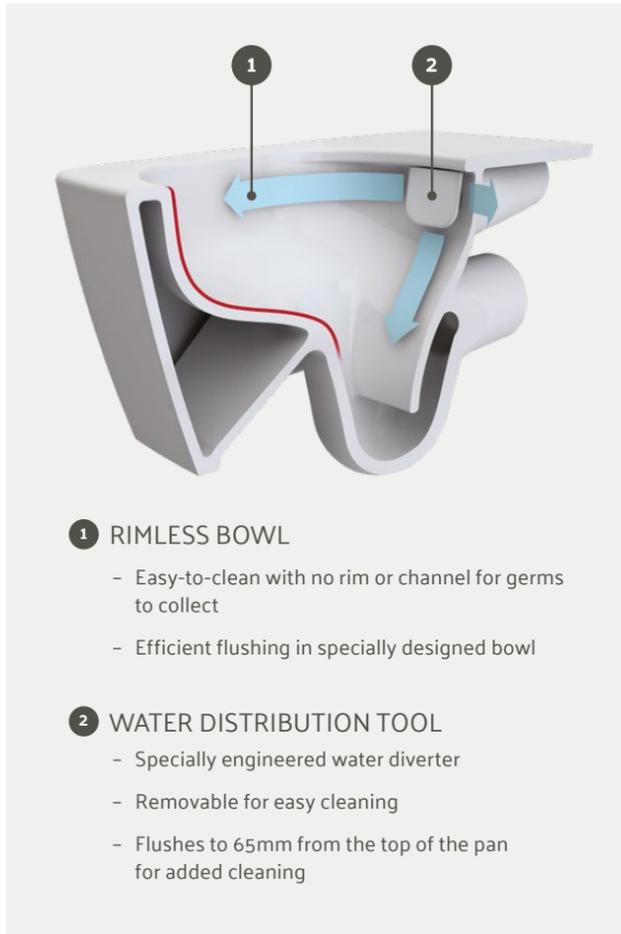

S50
PAGE 20

ZENTRUM
PAGE 24

S20
PAGE 29

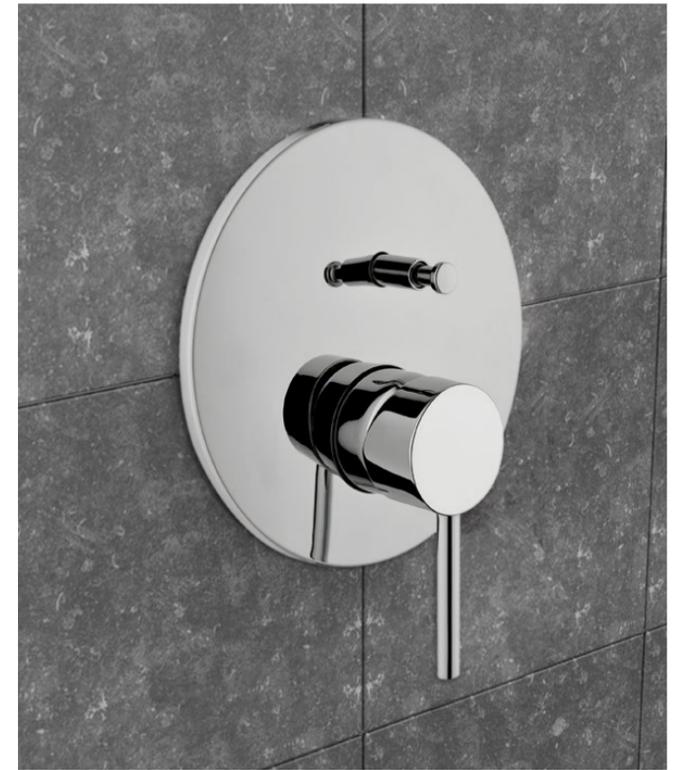

- 1 RIMLESS BOWL**
 - Easy-to-clean with no rim or channel for germs to collect
 - Efficient flushing in specially designed bowl
- 2 WATER DISTRIBUTION TOOL**
 - Specially engineered water diverter
 - Removable for easy cleaning
 - Flushes to 65mm from the top of the pan for added cleaning

V-BOX

V-Box, by VitrA, is the new generation of non-thermostatic (standard) and thermostatic shower solutions for concealed bath and shower mixers enabling up to three water outlets (bath spout, overhead shower or handshower).

Whether you are looking for a contemporary design in either square or round shape, there is a range suitable for any bathroom setting.

SHOWER VALVE

The shower valve controls the flow of water, similar to the tap on a basin. Concealing the shower valve behind the wall creates more space under the shower head making cleaning easier.

For the visible (exposed) part of the V-Box shower valve there is a choice of 3 styles; each with a full range of matching basin and bath fillers.

For more information on V-Box, see page 68.

Blue Life

For our blue planet...

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including Vitra.

A PLEDGE TO THE FUTURE

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Vitra believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

PRODUCT CERTIFICATES

PRODUCTION CERTIFICATES

ISO 9001 Quality Certification / ISO 14001 Environmental Certificate / ISO 50001 Energy Management System Certificate / OHSAS 18001 Occupational Health and Safety Management System Certificate

The manufacturing plants are equipped with specifically designed recycling systems to reduce raw material and power consumption.

Under the guidance of effective waste treatment methods implemented by the Eczacıbaşı Building Products Division, in 2017 optimal purifying technologies were developed to recover water. Today Vitra, part of the Building Products Division, consume 35% less water of production output.

Temperatures of the ceramic kilns were also readjusted in the Vitra plant, reducing energy consumption by 15%.

The same responsibility for natural resource conservation guides the group in the development of products for both residential and public use. So you know choosing a Vitra product means you are contributing to saving the worlds natural resources.

For example, the 2.5/4 litre WC pan has been certified by the German LGA Institute and reduces water use by up to 60% compared to the single flush.

With Vitra's brassware equipped with an adjusting pin, special ceramic cartridges can be set to limit the amount of water released, creating savings of up to 60%.

Finally, thermostatic bathtubs and shower mixers save water and power by eliminating the need to adjust hot and cold water until the desired temperature is achieved, ensuring reliable water flow temperatures.

YOUR CONTRIBUTION TO SAVING WATER

Vitra's products are developed and designed in line with our Blue Life philosophy, and reflect our commitment to preserving and recycling natural resources.

EUROPEAN WATER LABEL

Vitra are committed to the European water label.

WRAS

Vitra products with WRAS approval mean they comply with the Water Supply (Water Fittings) Regulations and Scottish Byelaws.

If 250 WC pans were changed from a 9 litre to a 2.5/4 litre cistern, enough water would be saved to fill three olympic-sized swimming pools.

BATHROOM RANGES

Inspired by the tradition and principles of Turkish bathroom culture, our innovative bathroom products combine modern technology with world-class design to meet the style, standards and demands of the 21st century.

VitrA's designers combine high-quality materials with innovative design and space-saving technology to create bathroom suites and products that are practical, durable, and above all, a pleasure to use.

S50

Versatility is a defining feature of this range. Choose from contemporary square lines or organic, rounded forms in a range of sizes. Opt for a comfort or standard-height WC pan with a choice of compact or standard projections. The result is a bathroom suite to perfectly match the user's needs and taste.

BATHS

All VitrA baths provide a quality finish whilst making installation easy by having fully-encapsulated baseboards and frames.

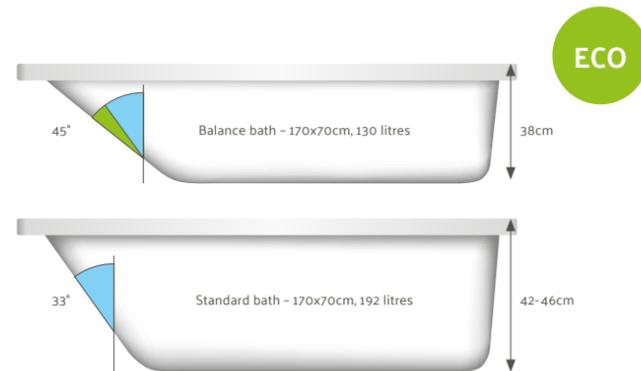

Bathing has always been associated with health, well-being and relaxation. VitrA's beautiful range of baths continues to evoke, uphold and enhance these associations. Whatever your preference, be it straight or offset, a sweeping line or a calming curve, our baths make bathing a sensory pleasure.

VitrA baths, made from high-grade acrylic, produce a superb finish. Each bath features a minimum of five adjustable feet, a fully-encapsulated wooden baseboard and frame, and an advanced wall fixing kit to keep the bath tightly in place, ensuring stability with no creaking or bowing. All baths carry a 25-year guarantee, and panels come with a 2-year guarantee.

SHOWER SYSTEMS	94

SHOWER SYSTEMS

The showering area is an important element in the bathroom and it is probably one of the hardest working elements of a bathroom design.

VitrA shower systems includes a collection of concealed and exposed shower valves to create the ultimate contemporary bathroom design. Exposed shower valves, hand showers (with and without slide rails), beautiful overhead showerheads and practical shower columns all have the design credentials synonymous with the VitrA brand.

To help select the right look for your bathroom, on page 72 VitrA introduces 5 complete shower solutions. Each shower solution brings together every working element needed to create a beautiful showering environment in one convenient package.

Choosing the right shower system is one of the most important aspects of bathroom design, especially given the wide variety of shower valves, handshowers and showerhead styles to choose from.

WHAT IS A SHOWER VALVE?

The shower valve controls the flow of water, similar to the tap on a basin.

There are two key considerations.

Firstly, shower valves can be either concealed behind the wall or exposed, typically a horizontal bar sits outside of the wall and contains all of the working parts.

CONCEALED SHOWER VALVES

Locating the shower valve behind the wall creates a contemporary look, allows for more space under the showerhead and makes cleaning easy because the only visible part of a concealed shower valve is the control plate. For increased flexibility the concealed valves can also be placed on a wall away from the outlet (bathtub, handshower or showerhead) they are controlling. For instance the valve could be installed at the entrance to the shower on one wall, but the shower kit (slide rail, fixed head etc.) can be positioned within the shower enclosure on the opposite side.

EXPOSED SHOWER VALVES

Unlike a concealed shower valve where the working parts are out of sight behind the wall, an exposed shower valve is ideal if you have a solid brick wall that cannot accommodate a concealed shower valve or if you are looking for a quick, easy to fit solution.

The second consideration is whether you want the shower water temperature to be regulated. Thermostatic shower valves are designed to prevent fluctuations in the temperature of the water. This is an important safety consideration where extremes in water temperature can be dangerous.

Standard shower valves are non-thermostatic and do not regulate the water temperature, this means if a tap is turned on elsewhere in the property the water from the shower may run too hot or too cold.

VITRA OFFERS A CHOICE OF SHOWER VALVES:

V-BOX - standard and thermostatic valve options (see page 78)

AQUAHEAT - thermostatic only (see page 88)

MINIBOX - standard valve only (see page 84)

WATER OUTLET OPTIONS

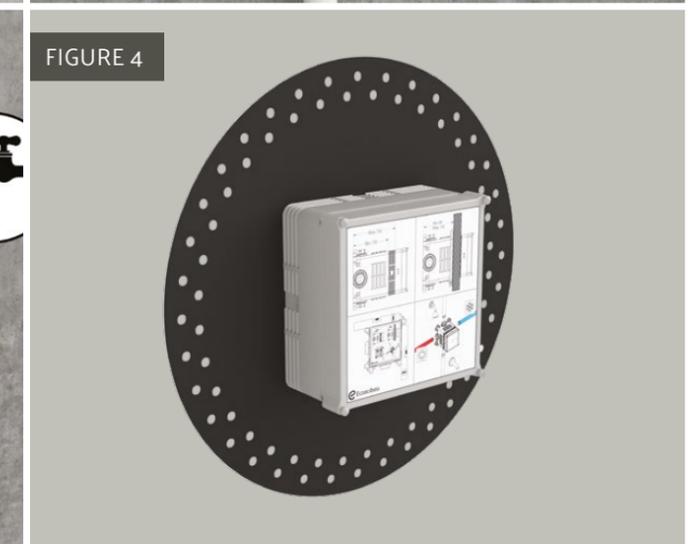

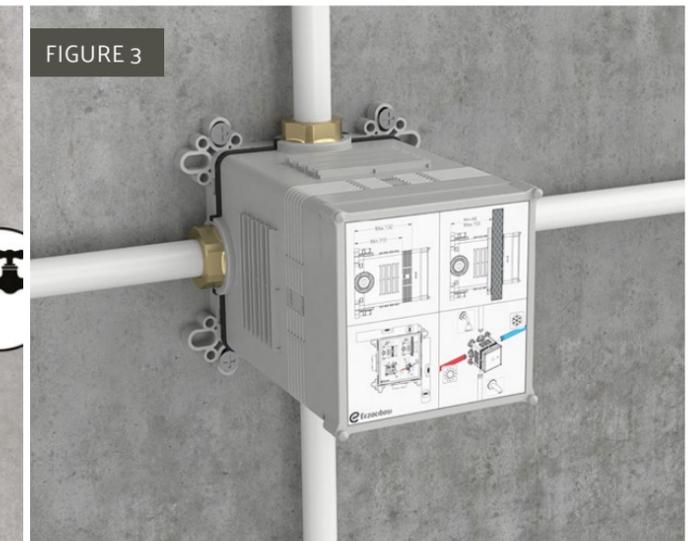

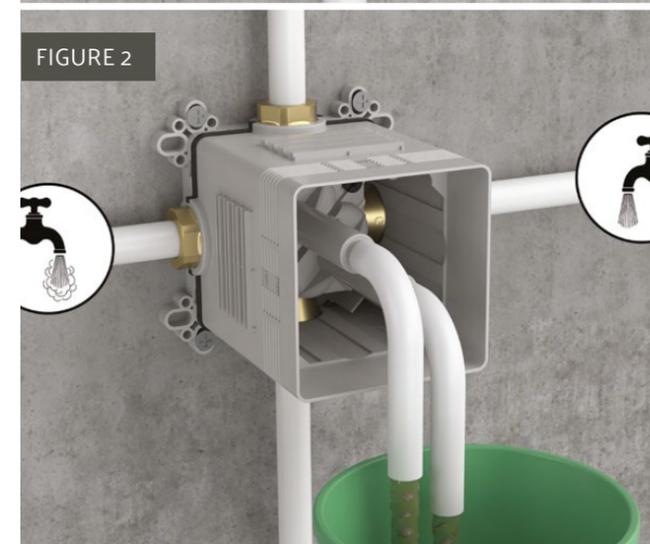

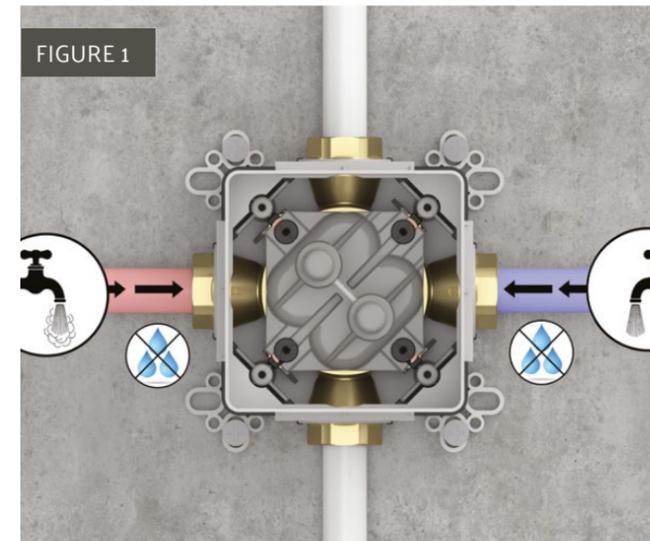

- 1-way:** shower mixer with adjustable water temperature control for either handshower or showerhead.
- 2-way:** water can be diverted to two of the following options: handshower, showerhead or to the bath. Water temperature is adjusted using one controller and the hot and cold water feed separately into the concealed valve.
- 3-way:** using a diverter, the water can be directed to either the handshower, showerhead or to the bath.

Diverter enables the flow of water to be switched from one outlet to another for example to the handshower or showerhead.

INTRODUCING V-BOX

V-Box, by Vitra, is the new generation of concealed shower valves enabling 3 water outlets (bathtub, handshower or showerhead). V-Box can also be trimmed to the correct wall recess and is available as standard or thermostatic.

For the visible (exposed) part of the V-Box shower valve there is a choice of 3 styles; each with a full range of matching basin and bath fillers.

INSTALLATION

FIGURE 1

IMPERMEABILITY TEST

The water inlet pipes are fitted as shown above. Ensure the V-Box is mounted correctly and tightly to prevent leaks. There are also multiple fixing points.

FIGURE 2

CLEANING

After connecting the water feeds the special V-Box design also allows for any debris that may have accumulated from the installation process to be flushed out.

FIGURE 3

GYPSUM PLATE WALL MOUNTING

Once the water inlet pipes are connected and cleaned, the box is fitted to the wall using the multiple fixing points. Special design enables easy mounting on gypsum plate walls.

FIGURE 4

HUMIDITY PROTECTION

To further protect the mechanism from humidity within the bathroom environment an insulating mattress is fitted. Additional sealing cuff protects the wall from humidity.

After tiling is completed, the front of the box is trimmed to the correct depth and the appropriate plate can be fitted.

V-BOX, CREATE AND CO-ORDINATE THE PERFECT BATHROOM FOR YOUR HOME FROM OUR EXTENSIVE RANGES

Image shown with X-Line built-in bath/shower mixer

CHOOSING THE RIGHT V-BOX SHOWER SYSTEM

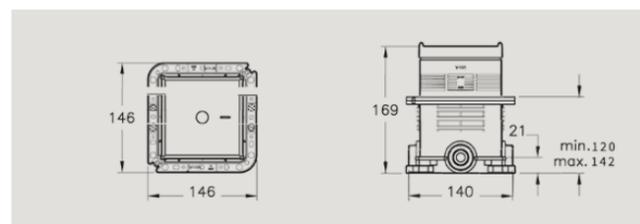

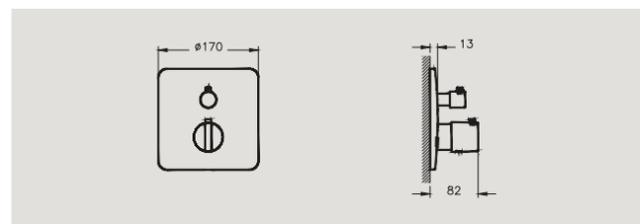

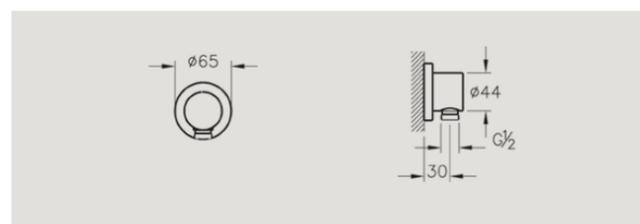

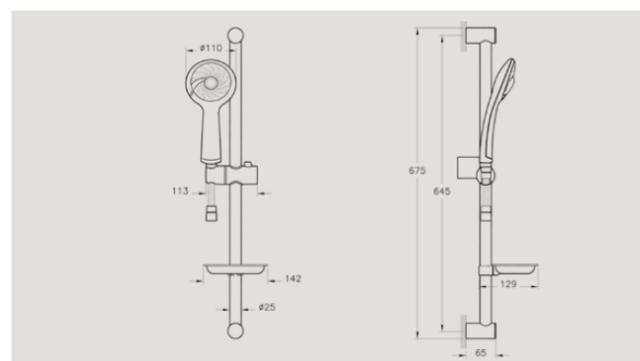

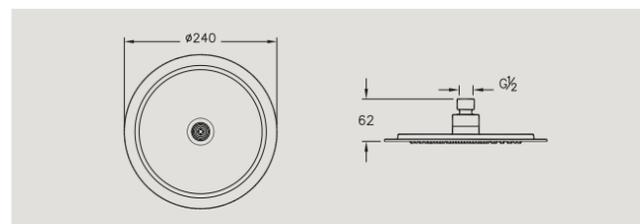

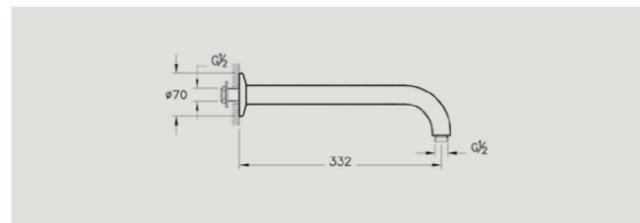

V-Box offer complete flexibility with a choice of square or round shaped control panels to suit any brassware range. Suit, Minimax S and X-Line all have complementary brassware, see pages 78 to 83.

All exposed parts are made from metal for added durability.

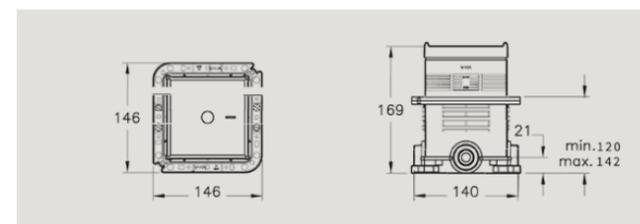

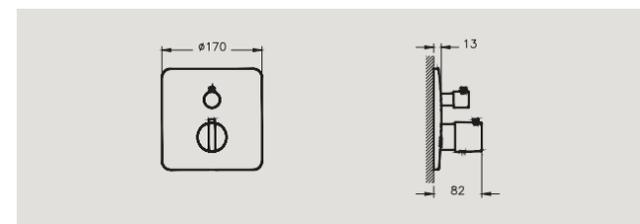

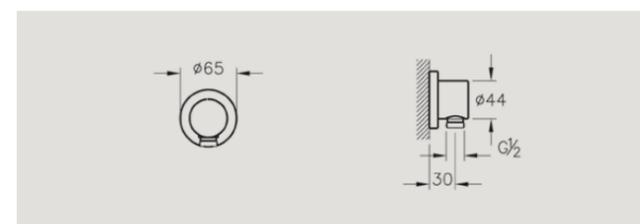

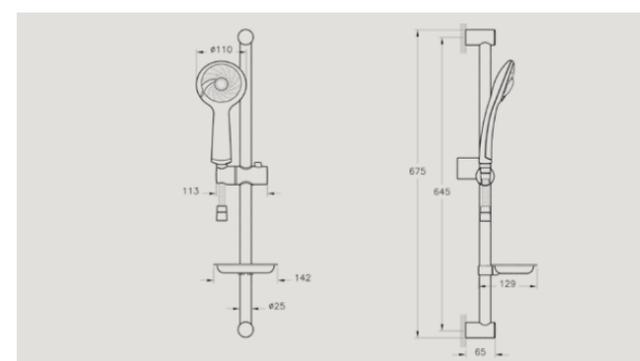

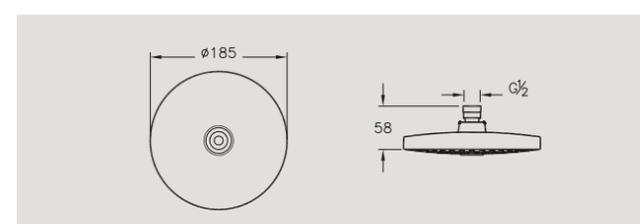

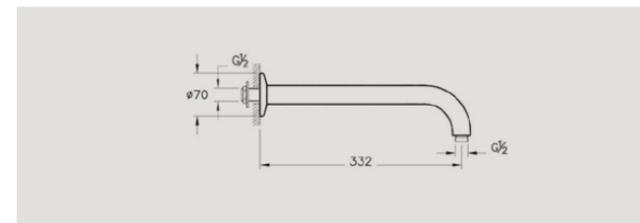

V-Box can be used with the new Suit ranges, Minimax S and X-Line, providing choice for consumers

MOVE SHOWER COLUMN

Updating your shower has never been easier with the new Move shower system. With two adjustable massage jets, a rain shower head and an integrated hand shower, creating a spa-like experience in your own bathroom has never been more affordable.

AVAILABLE IN:

WHITE

SILVER

ANTHRACITE

GOLD OAK

Easy
installation

Installation couldn't be more straightforward; simply disconnect and remove the existing shower, connect the hot and cold water feeds using the flexible hoses pre-installed in the back of the Move column and then fix the panel to the wall and you are ready to go.

RAIN SHOWERHEAD

INTEGRATED HANDSHOWER

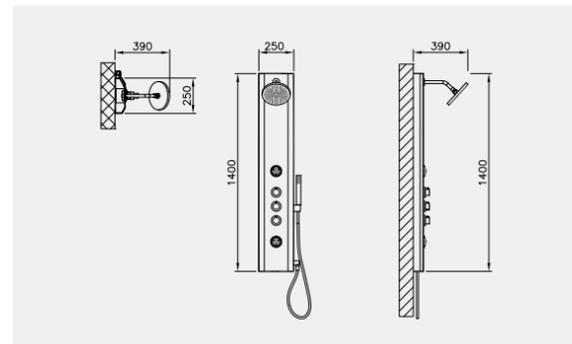

ADJUSTABLE MASSAGE JETS

TAPS & MIXERS

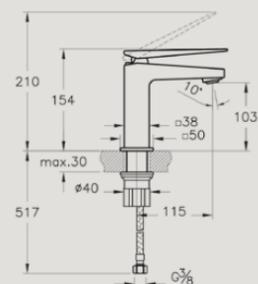

Add the perfect finishing touch to your bathroom with our brassware, designed to complement any bathroom suite.

VitrA mixes graceful curves with elegant angles to create brassware that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature controls require only the lightest of touches. Every consideration is given to conserving water and energy without compromising the user experience.

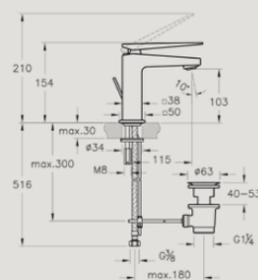

Designed and manufactured specifically for the UK market and to meet the requirements of varying UK water pressure, VitrA brassware is incredibly easy to install. The main body of each item is of brass construction, ensuring solid durability, further underpinned by the reassurance of a 10-year guarantee on chrome plating and 1-year replacement only guarantee on working parts.

WALL-HUNG FRAMES & FLUSH PLATES

VitrA's frame systems are crucial to any modern bathroom supporting and holding wall-hung WCs firmly in place. VitrA's reduce height frame provides the freedom to create a stunning room even with the limitations of a sloped roof or low window.

INSTALL & SPECIFY WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FOR THE MODERN BATHROOM

The last thing your beautiful bathroom needs is an unsightly mess of cisterns, pipes, U-bends and other functional elements spoiling the look and ambience. Using a wall-hung frame is the answer, and aside from a much tidier look, there are lots of practical benefits too.

 <p>HYGIENIC</p> <p>Keeping a bathroom clean is so much easier with a wall-hung WC. All pipework, usually a haven for dust, is completely concealed, and with the WC pan fixed above the floor, it's so much easier to keep the floor clean.</p>	 <p>QUIET</p> <p>Not only is the cistern concealed behind a wall, but it's also manufactured with a specially-engineered fill valve, and lined with insulating styrofoam to keep filling noise to an absolute minimum.</p>
 <p>SPACE-SAVING</p> <p>A wall-hung WC takes up less room than a conventional WC, providing greater flexibility where space is at a premium. In addition, the tidier arrangement, with more available floor space, also creates the impression of a larger bathroom.</p>	 <p>WATER-SAVING</p> <p>The dual-flush action for both the 8cm, 12cm and glass concealed wall-hung frames operates at 2.5/4 litres or 3/6 litres, resulting in as much as 70% reduced water consumption, benefiting both you and the environment.</p>
 <p>EASY ACCESS</p> <p>The flush plate can be removed easily, providing easy access to internal fittings. Flush plates have a 5-year guarantee.</p>	 <p>QUICK AND EASY INSTALLATION</p> <p>An intuitive design makes installation quick and easy – a real advantage, particularly when carrying out multiple installations.</p>

QUALITY AND ASSURANCE

RIGOROUS RELIABILITY AND PERFORMANCE TESTING

VitrA's wall-hung frames are subjected to rigorous reliability and performance testing at VitrA's production facilities.

 <p>OVERFLOW</p> <p>An overflow pipe located within the valve acts as a safety device. Overflow pipes are tested to ensure they can cope even in high water pressure areas.</p>	 <p>STRENGTH AND STABILITY</p> <p>Wall-hung WC pans and their concealed frames are designed to support up to 400kg.</p>
 <p>FLOW RATE</p> <p>Our cisterns undergo quality control testing to ensure that they meet international standards for minimum flush volume and flow rate.</p>	 <p>LEAK DETECTION</p> <p>Every cistern we manufacture is individually tested to ensure it is 100% watertight.</p>
 <p>PERFORMANCE</p> <p>All products are subjected to rigorous testing at our production facilities to ensure that they function perfectly before passing quality control.</p>	 <p>DURABILITY</p> <p>Our products are periodically tested for durability according to international standards. To pass this testing, every single component must still be functioning perfectly after 200,000 consecutive operations.</p>

SPECIFIC DESIGN FEATURES

9 INTERMEDIARY HOSE

The intermediary hose that connects to the water piping inside the cistern can isolate the water flow during service-oriented interventions, and enables easy replacement of parts.

1 FLUSH PLATE

The flush plate operates the cistern. It enables easy operation of the wall-hung frame and covers internal parts that remain in the wall.

8 PANEL GAP

The panel gap on the body is designed to provide optimum opening space for the maintenance of the filling or flushing units and enabling easy access to the cistern. The size of this gap is very important for servicing purposes.

2 BODY

The filling and flushing valves are located in this part of the cistern. Produced from polyethylene (HDPE) raw materials, it offers more safety with its flexibility and resilience.

7 BODY STYROFOAM

The styrofoam coats the entire lower body and prevents condensation forming in the cistern and provides sound insulation.

6 FLUSHING VALVE

The flushing valve transfers the water in the cistern to the WC pan. For correct and reliable functioning, flushing units are subjected to 200,000 watertightness and accelerated life tests at the factory.

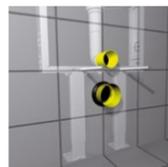

3 FILLING VALVE

The filling valve is the system that fills the cistern with water. The filling valve is checked in Vitra labs for "water-tightness" via accelerated life testing 200,000 times. The filters above the filling valve eliminate the risk of clogging, ensuring durability and a long lifetime. New Vitra filling systems ensure fast and silent filling.

5 METAL STAND

Metal feet enable the easy adjustment of height from the floor and provide fixing points.

4 OVERFLOW PIPE

When too much water enters the cistern, the overflow pipe in the flushing mechanisms channels the excess water into the WC pan, preventing the risk of flooding.

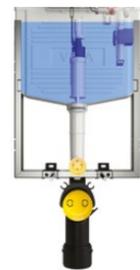

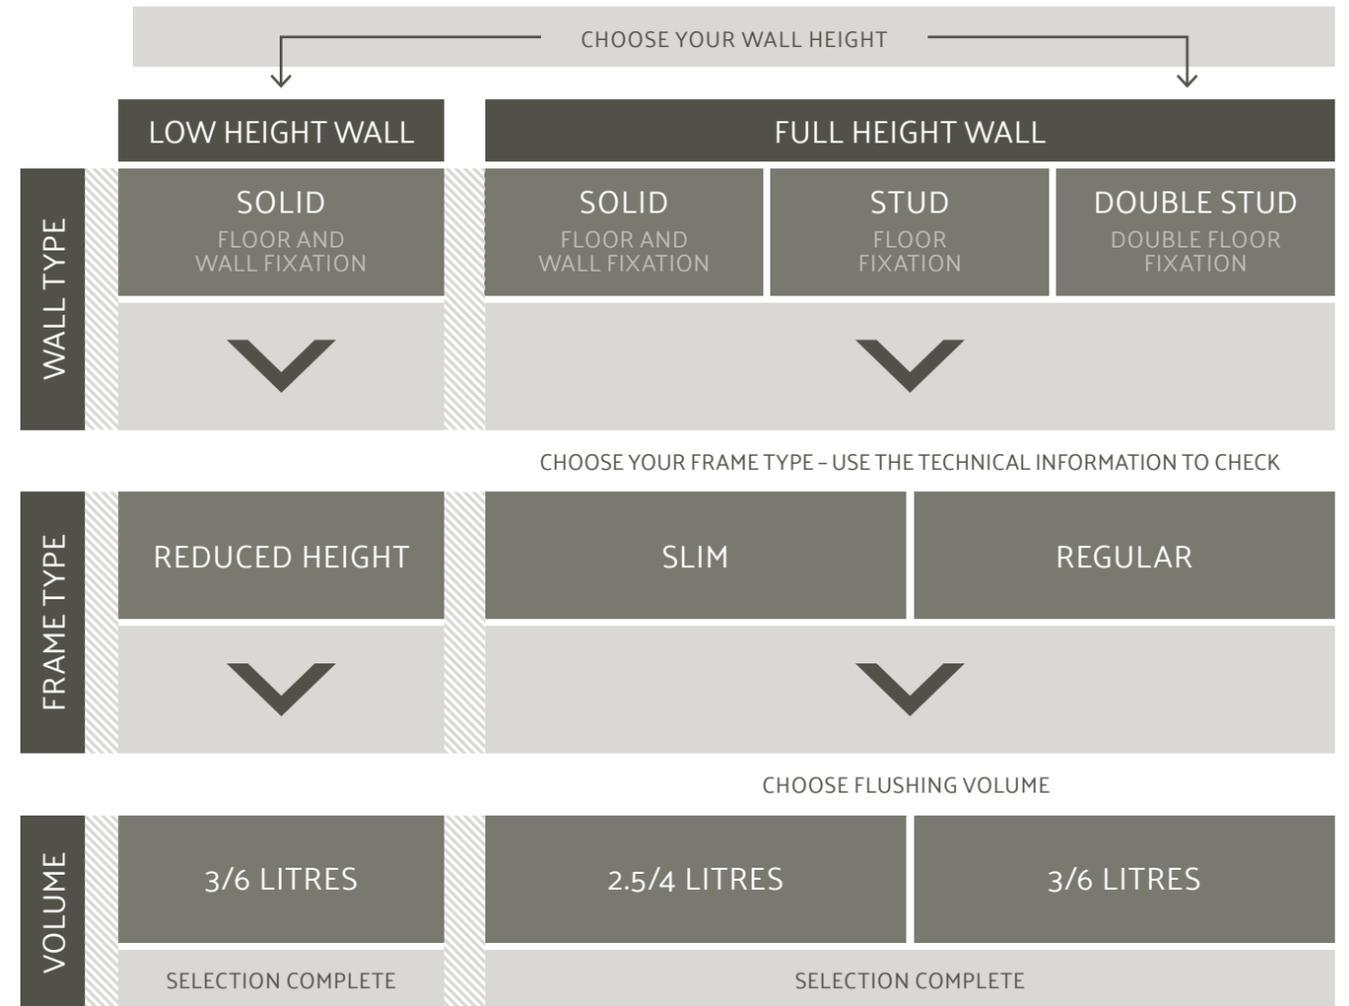

Image for illustration purpose only (regular frame)

FRAMES

Whatever your project needs, the frames range from Vitra offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window.

Both the slim and regular sized frames can be used in solid, stud and double stud wall scenarios and are both available with a choice of flushing volumes.

Vitrus, the new glass concealed cistern for wall-hung and back-to-wall WCs can be used with any wall type. This unique solution removes the need to create a false wall to hide the frame. For more information, please see page 192.

Vitra also offers two choices of concealed cisterns for back-to-wall WCs.

To complete the range, Vitra also has a number of installation frames for urinals, bidets and washbasins.

FLUSH PLATES

With a Vitra wall-hung frame, only the flush plate is visible; two buttons that release either a large or small quantity of water.

Vitra offers a wide range of design solutions, with different finishes and shapes, giving you the freedom to create the bathroom you've always wanted.

Most Vitra flush plate designs include an anti-fingerprint finish option. This finish is extra hygienic, as it is easier to clean and protects against bacteria.

Whether it's a mechanical, pneumatic or electronic panel system required, Vitra has a flush plate and frame to suit.
