Use the icon guide below to help you identify the key features of our products.

# 

#### Shower system

Shower sprays Aqua soft Aqua massage Aqua rain Aqua spray Aqua AirDrop Aquaheat show

Constant temperature
 Easy clean
 Easy installation
 Cool touch

#### Aerators

 Water-saving
 Water-saving aerators use significantly is water while maintaining a strong flow of 5 litres per minute.

 Swivel
 Swivel aerators can easily be angled to reall corners of the washbasin, allowing yo to change the direction of the water flow

 Coin-slot
 Coin slot aerators can be conveniently rewith a coin, making them easy to clean.

#### Thermostatic

Thermostatical controlled

temperature by recognising changes in water pressure or temperature and adapting to them.

#### Concealed parts - see page 84 for full technical information V-Box A42263 The concealed V-Box valve can be installed in brick walls up to 77mm in depth and is compatible with a variety of thermostatic mixers. # Concealed part included

#### Eco-friendly features

🗐 BluEco

Water and energy-saving products are marked throughout with these symbols. Our mixers include adjustable cartridges to limit maximum heat and flow from the tap, which can save up to **60%** water waste.

aving energy by supplying cold water instead of arm water when the tap is turned on at **90** degrees.

#### Water pressure

in your plumbing system when choosing your brassware. Whether it's a gravity, combination boiler, pump assisted or mains high pressure (ask your installer if you're unsure), knowing your system will help you find the best product.

The minimum water pressure requirements for each product are marked in the brochure. Most products will suit any water system, however the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

#### ccreditations

sustainability, preventing contamination.

reen Building Certification is awarded to roducts that meet the criteria of eco-friendly eatures, lower environmental footprint and vater consumption. They are recommended for rojects aiming for a Green Building Certificatio

Class A Unified Unified Water Label indicates a products efficiency, Water Label Class A is awarded to products with the lowest

> Flow rates are measured under test condition with a **3.0** bar water pressure, in accordance with European standards.

#### Manufacturing & testing

With over 40 years of brassware manufacturing experience, we've developed a reputation for producing beautiful products that deliver on both form and function, and we're now producing 3 million pieces of brassware each year as well as 2.5 million accessories.

> VitrA's €40 million investment in brassware will contribute to improved quality and efficiency over the next three years. The first phase of this project focuses on improving our brassware manufacturing plant in Bozüyük, which will reduce production costs by 15% and increase production capacity by 3.2 million pieces.

In addition, further developments have been made to enhance PVD capability, chrome and zamac production.

All products are manufactured from materials that ensure a long product lifespan. Our bathroom taps are manufactured from high-quality brass, which results in highly durable products as well as a low lead content. Therefore, we are proud to offer a lengthy warranty period to our customers.

We vigorously test all our products, above and beyond the minimum standards of testing.

- Our brassware cartridges are tested nearly (1)2 million times more than the European standard
- We test against brassware corrosion for **720 hours,** compared to 2 the average of 200 hours, to ensure all of our taps keep their shine
- Our shower hoses are tested for strength by tying (3) on **1.8** kg of weight and bending it **10,000 times**
- Our durability testing is **10 times more** than the average, (4)applying 50 bar water pressure instead of just 5 bar, to ensure they won't leak even after years of use

#### Our promise to you

VitrA products are designed and built to the highest standards. As a result, we can proudly offer customers a 10 year warranty on all VitrA brassware and a 5 year warranty on all showers and accessories.

If you have a manufacturing fault with one of our brassware products within 10 years, we will replace the working parts for free.

# Behind the engineering

BRASSWARE

YEAR VITRA WARRANTY

SHOWERS & ACCESSORIES

# Blue Life

Evolution depends on being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a VitrA product, you are contributing to saving the world's natural resources.

#### Our pledge to the future

- Continue the use of renewable resources in the production process
- Develop products that promote power and resource conservation
- Make significant investments towards boosting eco-efficiency

# Sustainability for our blue planet

Throughout this brochure, VitrA mixers that are certified by the Unified Water Label are indicated by this icon, which can reduce water usage by 60%, even at the lowest consumption rate (5 litres/minute).

Blue Life

For our blue planet.

We are committed to reducing the use of non-renewable resources in the production process.

With a heat regulator, flowrate control and an exclusive flow regulator, the basin mixer cartridge allows for additional water and energy savings. Our natural resources can be conserved when we control the amount of water and energy we use.

VitrA opens its first brassware plant within its Bozüyük complex.

1992

VitrA opens its first sales and marketing office outside of Turkey, introducing VitrA UK.

With the opening of the VitrA Innovation Centre at Bozüyük, all research and development teams are consolidated under one roof.

1985

VitrA produces a single lever tap for the first time.

VitrA establishes its first PVD coating production facility in Turkey.

VitrA opens its flagship showroom in Clerkenwell, London showcasing all brassware ranges under one roof.

VitrA launches its first fully comprehensive brassware and accessories range available in four colour finishes; Origin.

# Brassware history

# 2023

Investing **40** million in brassware will improve quality and efficiency. In phase one, production costs will be reduced by **15%** and production capacity will increase by **3.2** million pieces at our brassware manufacturing facility in Bozüyük.

VitrA is an international brand exporting brassware to **75** countries worldwide. Introduction

**Taps** 

# Striking finishes

A range of colour finishes are created by Physical Vapor Deposition (PVD) process. This state-of-the-art manufacturing process involves metal powders being vaporised and deposited onto the surface of the tap. This produces a striking look that remains corrosion-resistant and scratch-resistant.

By building layers throughout the coating process, PVD finish is more durable ensuring your brassware doesn't lose its shine.

Electrostatic Powder Painting (EPP) is a method of surface coating without the use of solvents. Special paint guns are used to fire tiny powder paint particles to form the final layer of paint. When particles with a high electrostatic charge pass through the gun, they adhere to the material inside. The coated product is processed at high temperature where the powder paint melts and adheres to the surface.

Colour code extension	Colours	Method
23	Gold	PVD
26	Copper	PVD
34	Brushed Nickel	PVD
39	Gloss Black	PVD
36	Matt Black	EPP*

66 It's pure artistry when our designs are crafted into something tangible and beautiful. 99

Erdem Akan, VitrA Design Director

Taps

# Taps

Find the perfect complement to your bathroom with our stunning tap collection.

Championing both aesthetics and ergonomics, each piece is meticulously engineered to optimise flow, temperature regulation and the use of water and energy.

All products include a 10-year guarantee on chrome plating and a 1-year replacement-only guarantee on all working parts.

# Choosing your shower system

Choosing the right shower system is one of the most important decisions when it comes to designing your bathroom. To keep things simple, here are three steps to help you select the right shower system for your bathroom.

# Step 1

Choose between a concealed or exposed system based on the type of wall you have

## Step 2

Choose your showerhead and/or hand shower

# Step 3

Adding a bath to your bathroom equation?

**3-way:** A diverter allows the flow of water to be switched from one outlet to another.

These are shown on page 64

#### Solid wall Exposed

Wall-mounted shower mixer

- 1-way: Shower mixer with adjustable water temperature control to a single outlet: hand shower or overhead shower.
- 2-way: Shower mixer with adjustable water temperature control can be diverted to two outlets: hand shower, overhead shower, or bath spout.

We have a wide range of showerheads and hand showers to match our bath, shower and basin mixers. From traditional to modern, round to square, powerful to water-saving, you can find one that perfectly matches the other elements of your bathroom design.

# Shower sprays

Whether you are starting or finishing your day, we have the perfect showering experience for you.

From a soft and gentle spray to a strong and energising spray, you can choose from a variety of options.

# Aqua soft

By adding a soft spray of water to your shower, it brings a sense of calm, peace and tranquillity.

# Aqua massage

A stream of intense shower spray with massage function to relieve tension and relax the body.

# Aqua rain

Combining relaxing and energising streams that feel like raindrops to give a luxurious showering experience.

## Aqua spray

This shower flow is the perfect way to start a new day or wind down for the evening with its refreshing effects.

Taps

**Concealed Shower Systems** 

ver Systems

sed Shov

Expos

Accessories

# Aqua AirDrop

By mixing air into the water flow, a more powerful spray can be generated while reducing water consumption. The water droplets are bigger and soft, providing a more relaxing shower experience.

# Aqua stream

You can enjoy a powerful shower experience with the direct flow of intense water that streams from your shower head.

# Concealed Shower Systems

A concealed showering system hides the mixer valve behind the wall, just leaving the control plate on display.

They can be installed in any style that you desire, allowing for maximum space-saving and ease of cleaning. The concealed valve can also be mounted on a wall away from shower outlets and the wet space so you can turn your shower on without getting wet.

## Concealed thermostatic mixers

Designed by VitrA, the V-Box concealed shower valve enables up to three water outlets (handheld shower, overhead, or bath spout). V-Box can be trimmed to fit 77mm wall thickness, which is standard in the UK. Adaptable to any bathroom design, simply choose your preferred control plate. Alternatively, Aquaheat's thermostatic mixers are designed with the concealed part already built-in, perfect for any bathroom setting and you have the option of soft rounded edges or modern contemporary square.

# Exposed Shower Systems

Exposed shower systems are ideal for brick wall installations and are designed to provide versatility and ease of installation, making them a quick and easy option.

Aquaheat shower packs contain all the necessary components for creating the perfect showering experience.

Featuring a thermostatic overhead and hand shower, each shower includes a water-saving button to change the spray and control the flow of water, thus reducing water consumption. Some Aquaheat showers have the 'cool touch' feature which prevents the shower mixer from becoming too hot to touch. Look out for the cool touch icon:

# Touchless

Convenient to use and beautiful to look at, these touchless basin mixers are activated by movement in front of an infrared sensor.

This eliminates the need to touch the tap and therefore reduces the possibility of transferring germs and bacteria.

Please use the fold out to reference the **Icon Guide**
