Designer Collection

## Welcome to our Designer Collection, created in collaboration with world- renowned, forward-thinking designers.

Showcasing the very best in bathroom design and utilising the latest technology, our exclusive designer ranges will elevate your bathroom experience to a whole new level. Check out our most recent range Liquid (page 12), designed in collaboration with Tom Dixon, the acclaimed British designer.

Innovation and creativity drives product development. We pioneer the latest technology in our smart-app flush plates (page 248), use inventive engineering for superior hygiene in the Rim-ex™ range (page 240), apply our VitrA Hygiene glaze as standard to all ceramic pieces (page 227) and draw on our 50-year heritage and expertise to develop unique finishes and manufacturing processes for outstanding quality.

But to be truly innovative means being responsible for future generations. We are committed to reducing the use of non-renewable resources, not only during manufacture, but also in product development to ensure power and water conservation for every VitrA product. We call it Blue Life (see page 257).

Ultimately, our mission is to elevate your everyday bathroom experience into something beautiful, relaxing and life-enriching. So, step inside these pages, we've got everything you need.

See back page for the full index.

Our award-winning designs  
are the result of our unique  
collaborative approach.

Meet our award-winning designers

Tom Dixon

Relentlessly innovative and incomparably creative, self-taught designer Tom Dixon is a leading figure of the design industry.

Liquid range

Arik Levy

Inspired by his time living and working in Japan, Arik's award-winning minimalist designs are exceptionally versatile.

Voyage range

Claudio Bellini

Based in Milan, Claudio fuses the organic beauty of nature with modern urban architecture to create fresh, futuristic designs.

Equal range

Christophe Pillet

A celebrated international designer, Christophe's designs are true to his modern style: timeless and elegantly simple.

Memoria range

Ross Lovegrove

Ross Lovegrove is internationally renowned for his ability to create organic, sculptural shapes using sophisticated technology and materials.

Istanbul range

Matteo Thun & Partners

This world-renowned, Milan-based studio, headed up by Matteo Thun, has a deep understanding of the latest materials, resulting in designs that are truly original.

Water Jewels range

Pentagon Design

The human-centric approach of Finland-based Pentagon Designs results in accessible, adaptable and timeless styles.

Nest Trendy range

Terri Pecora

Milan-based American designer, Terri Pecora, presents the bathroom as an informal living space, making it the new heart of the home.

# Liquid

The Liquid collection evokes a sense of permanence with soft and rounded forms in durable white porcelain. The bones of this collection are the all-white ceramics, offset with signature chunky brassware in either gloss black or classic chrome finish – a quintessential and timeless core aesthetic for the bathroom. The range also includes distinctive wall tiles, available in five designs and with colour options of White, Black, Grey, Sage Green and Ecru, furniture and accessories.

For complete technical specifications for all of our products, please visit [vitra.co.uk](https://vitra.co.uk)

# Origin

Created by Design Studio Vitra, grace shapes the Origin Collection's minimalism. Origin is a meeting point for mixers, accessories, shower systems and counter solutions. Subtle lines, sleek designs with colour alternatives create a wealth of choice leading to a truly customisable bathroom environment.

The Calacatta Silk Neolith worktop is made of hard-wearing, man-made stone, a fusion of ceramic and porcelain, combined with a beautiful mix of quartz, glass and silica. The durable surface is liquid-resistant with low water absorption, making it ideal for the bathroom.

For complete technical specifications for all of our products, please visit [vitra.co.uk](https://vitra.co.uk)

# Memoria Infinit

Characterised by its simplicity, this range features washbasins and bathtubs that are made from mineral cast with an ultra-thin edge. By harnessing new techniques and materials, this range is almost a work of art in its own right, creating a sense of poise and balance.

For complete technical specifications for all of our products, please visit [vitra.co.uk](http://vitra.co.uk)

Manufactured by using a combination of natural stone powder and polyester resin, mineral cast produces a beautiful finish that is easy to clean and warm to the touch.

Left - Rectangular countertop bowl, 80cm, Infinit mineral cast £812 (89005)

Below - Oval countertop bowl without overflow hole, OTH, 80cm, Infinit mineral cast £778 (89004)

# Sento

Sento brings scandinavian style into the bathroom. This furniture range is designed to complement the popular Sento WC pan. Four matt furniture finishes, including the new Matt Light Grey option and five basin sizes are available, including a compact cloakroom option. With sensor LED lighting underneath the washbasin units and a leg set option, this range provides a new take on bathroom furniture.

## Icon guide

### Dimensions

H - Height  
P - Projection (mm)

OTH = No tap hole  
1TH = 1 tap hole  
2TH = 2 tap holes  
3TH = 3 tap holes  
4TH = 4 tap holes

**Touchless**  
Controlled by a built-in sensor, our touch-free technology ensures increased hygiene in the bathroom.

### Water pressure

- LP** Low (0.4 bar)
- MP** Medium (0.4 - 1.0 bar)
- HP** High (above 1.0 bar)

### Eco properties

- Water-saving**
- Energy-saving**
- Thermostatically controlled**
- BluEco**  
Saving energy by supplying cold water instead of warm water when the tap is turned on at 90 degrees.

### Aerators

- Water-saving aerator**
- Swivel aerator**
- Coin-slot aerator**

### Concealed parts

- B1** Concealed part for built-in basin mixer A40835
- B2** Concealed part for built-in basin mixer A42230
- B3** Concealed part for built-in bath/shower mixer A40834
- M1** Minibox, 1-way A42213
- V1** V-Box A42263
- B4** Concealed part for 2-way diverter A42856
- B5** Concealed part for 3-way diverter A42858
- B6** Concealed part for Origin touchless A47112
- M2** Minibox, 2-way A41949
- Concealed part included**

### Accreditations

Water Regulations Advisory Scheme promoting sustainability, preventing contamination

Unified Water Label indicates a products efficiency, Class A is awarded to products with the lowest possible water and energy consumption.

Green Building Certification is awarded to products that meet the criteria of eco-friendly features, lower environmental footprint and water consumption. They are recommended for projects aiming for a Green Building Certification.

# Choosing your shower system

Choosing the right shower system is one of the most important aspects of your bathroom. However, we know it can be overwhelming with so many aspects to consider. To keep things simple, we have created this step-by-step guide.

## Step 1

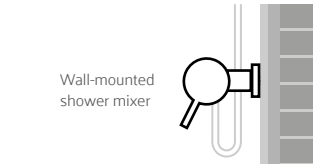

Decide between a built-in or wall-mounted shower mixer, depending on the type of wall you have (cavity or solid)

### Cavity wall

For a cavity wall you can choose between a built-in or a wall-mounted shower mixer. Built-in shower mixers create a minimalist look, opening up more space under the showerhead. Built-in shower mixers must be used with a concealed shower valve, either V-Box (see page 188), Minibox (see page 190) or Aquaheat (see page 202).

### Solid wall

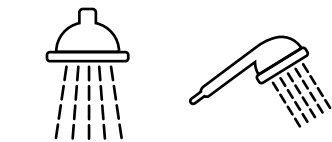

For a solid wall, the common solution is a wall-mounted shower mixer for its versatility, ease of fit and range of different styles.

184

## Step 2

Choose your showerhead and/or hand shower

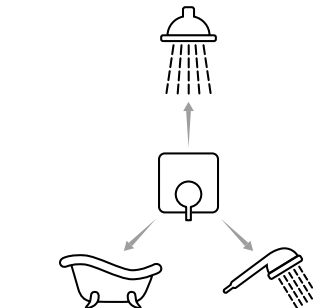

We have a wide range of stylish and practical showerheads and hand showers to match our bath, shower and basin mixers. From traditional to modern, round to square, powerful to water-saving, you can find one that perfectly matches the other elements of your bathroom design. See page 194 for our showerhead and hand shower options.

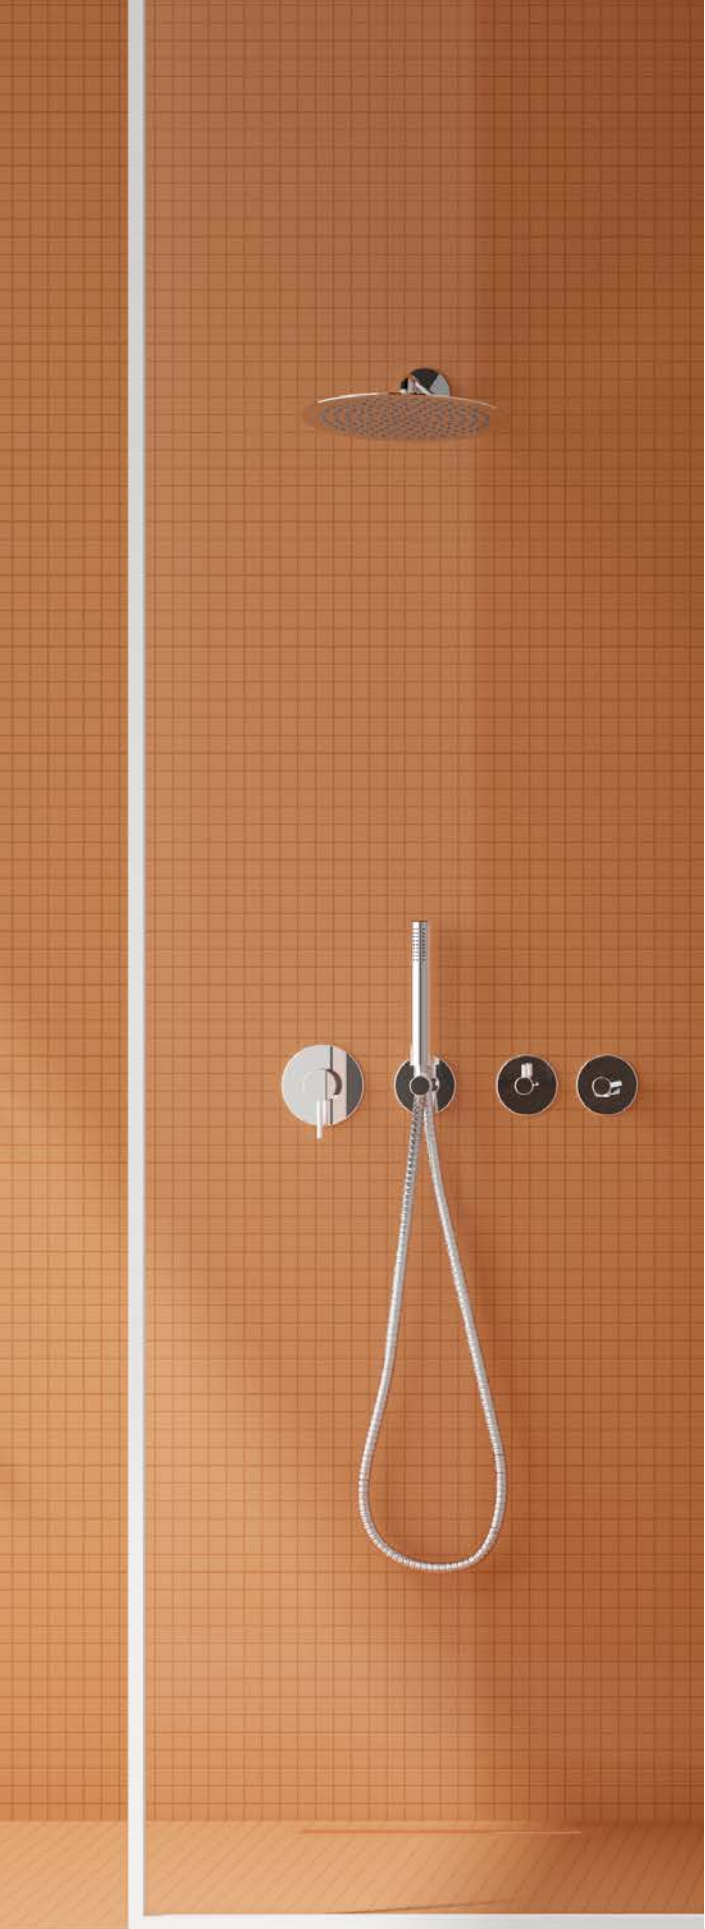

## Step 3

Adding a bath to your bathroom equation?

You'll need a diverter to enable the flow of water to be switched from one outlet to another, such as the showerhead to the bath. Our range of diverters come in styles and finishes that match our mixers to give you a complete look. These are shown on page 192.

For our complete shower systems see page 204.

## Shower sprays

From kick-starting your day to winding down at its end, we've got the perfect shower experience to match your mood. Below are a number of different spray options, from soft and gentle to strong and energising.

Aqua soft

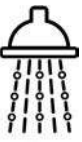

Aqua massage

Aqua rain

Aqua spray

### Shower mixer types

The mixer controls the flow of water, similar to the tap on a basin.

#### Thermostatic shower mixers

Our thermostatic showers allow you to enjoy a shower at the precise temperature you want, whilst ensuring it is sustained throughout your shower. Carefully mixing the hot and cold water supply, the thermostatic shower mixer recognises changes to water pressure or temperature; so if a tap is used, a bath run or toilet flushed elsewhere in your home, your shower will remain at your chosen temperature.

Why a thermostatic shower?

- Perfect for busy households, the consistency in temperature prevents the risk of sudden and unsafe water temperature changes
- Water and energy consumption is reduced with the sustained temperature, lowering your bills
- You can find the exact water temperature that gives you the most relaxing and enjoyable shower experience, and return to this temperature every time you shower
- With our 38° safety buttons, the water will never exceed this temperature unless the button is pressed – ideal for those with young children.

Thermostatic shower mixers are available as behind the wall (built-in) and wall-mounted.

#### Manual shower mixers

Our manual showers allow you to adjust both the temperature and flow rate allowing a high level of temperature control through the valve.

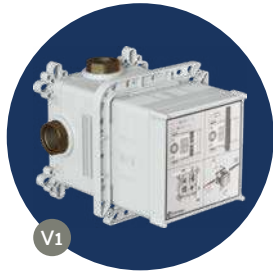

Our thermostatic showers are marked with the above symbol.

# Built-in thermostatic shower mixers

## V-Box concealed thermostatic shower valve

V-Box offers complete flexibility to fit any bathroom design. It enables three water outlets (bath, hand shower and/or showerhead) and can be used with a range of square or round thermostatic built-in mixers. For 3-way showers (bath spout, hand shower and showerhead), select a 1-way thermostatic shower mixer and 3-way diverter – see page 192 for our diverters. V-Box can be trimmed to fit a 77mm wall depth which is standard in the UK and is compatible with our thermostatic shower mixers listed below.

# Aquaheat shower packs

Our Aquaheat shower packs provide the ultimate in convenience; all the necessary components to create the perfect showering experience are packaged in a simple box.

Every Aquaheat shower is thermostatic and includes a showerhead and hand shower. The hand shower also incorporates a water-saving button to control the flow of water to minimise water consumption or to change the shower spray experience.

198

Some of the Aquaheat showers include the 'cool touch' feature which prevents the shower mixer from becoming too hot to touch, particularly important for children and vulnerable people. Look out for the 'cool touch' symbol.

## Innovation, design and creativity drive product development.

At our Innovation Centre, leading architects, designers and engineers collaborate to bring new and exciting ideas to life, to push the boundaries of bathroom design via the development of new technologies and materials.

### Touchless basin mixers

Our touchless basin mixers and accessories add another dimension of hygiene to the bathroom. Controlled by an infrared sensor this eliminates the need to touch the handle or lever. The taps are easy to use and extremely hygienic.

### Smart technology in everyday products

Our latest generation V-Care shower toilets (page 234), combine the functionality of a toilet with the personal hygienic benefits of a bidet, fully customisable and remote-controlled to create the ultimate bathroom experience.

Alternatively, the Aquacare shower toilet (page 236) benefits from an integrated and mechanically operated bidet function, as well as complete ease of installation, while our unique Rim-ex rimless toilet design (page 240) promotes effortless hygiene and beautiful clean lines.

### VitrA Clean

A surface finish that makes VitrA sanitaryware products incredibly easy to care for. This special glazing process increases surface tension so the water flows easily across the surface. All that's needed to keep the basins clean is a wipe with a damp cloth and the use of a mild detergent, making cleaning easier and helping to keep your bathroom looking its best. VitrA Clean finish is on a variety of basins including the Outline range.

### VitrA Hygiene

A unique glazing process developed by VitrA that prevents germs multiplying. From washbasins to WCs, bidets to urinals, products produced with our VitrA Hygiene technology offer superior cleanliness throughout the product's lifetime. VitrA Hygiene is applied as standard to all ceramic products.

### Greener living

We are committed to reducing non-renewable resources, not only during manufacture but also in product development, to ensure power and water conservation for every VitrA product.

The VitrA Smart Panel (page 248) syncs with your phone via a dedicated app, putting you in complete control of your water usage. Its latest sensor technology creates our most hygienic and efficient flush ever.

In addition, all our flush plates (page 244) release exactly the right quantity of water, helping you to monitor and conserve usage in one simple action.

Finally, our concealed cisterns (page 253) and wall-hung frames are the hidden partner in the design of your bathroom, allowing you to protect that other precious resource – your space.

For more information about our commitment to innovation and the environment, visit [vitra.co.uk](http://vitra.co.uk)

# Touchless basin mixers

Convenient to use and beautiful to look at, these touchless basin mixers are activated by movement in front of an infrared sensor. This eliminates the need to touch the tap and therefore reduces the possibility of transferring germs and bacteria.

# Shower toilets

The health and hygiene benefits of washing with water after using the toilet are becoming better understood as people experience that just-showered feeling. Latest innovation and product developments have enabled the creation of a range of options but choosing a shower toilet that will meet your current and future needs can be daunting, so we have created this simple guide to help you through the process.

A shower toilet combines the functionality of a WC with the cleaning properties of a bidet all in one product – no need to find space for a bidet. Using a shower toilet is also kinder and gentler to you and there are also notable environmental benefits through the reduced reliance on toilet paper.

At VitrA, we offer a range of options depending on what kind of washing experience you want. Sophisticated multifunction shower-toilets offer wash, dry, and room deodorise features. Some have helpful additions such as sensor lighting which will light up the bathroom when anyone enters the room. At the entry level the Aquacare shower toilet offers just the simple convenience of washing with water.

Here are some key questions to consider to help navigate you through the choice of shower toilets:

232

**So, what is a shower toilet in simple terms?**

At its simplest a shower toilet is a standard toilet with the addition of a wash-with-water feature. They can also be referred to as bidet-toilets or washlets. As you move through the options you can choose additional features, one of the most important is to ensure the water is thermostatically controlled for maximum comfort and washing effectiveness.

**So why do you need a shower toilet, when we have toilet paper?**

Toilet paper is environmentally unfriendly, costly and has an unseen impact in our sewer systems. Toilet paper is not as effective at cleaning the body as water. Shower toilets significantly reduce the amount of toilet paper needed, which is better for the environment and for your pocket.

**My bathroom is small – which unit is best suited to a small space?**

The shower toilets from VitrA use the same amount of space as a standard WC.

**Is a shower toilet environmentally friendly?**

Did you know that a single roll of toilet paper uses **37** gallons of water to manufacture? Or that **27,000** trees are flushed down the drain every day? On average, toilet paper usage is reduced by **75%** when using a shower toilet. Some shower toilets, such as VitrA's V-Care Comfort model, offer a completely paperless solution, thanks to the washing and drying features.

**Will I need a power connection?**

That depends.

No, if you choose from the Aquacare range these are purely mechanical not requiring any power connection, all you need is hot and cold-water feeds.

If you choose from the V-Care range given the additional features such as the heated seat you will need a power source. The work must be done by a Part P compliant electrician and meet all the regulations for bathroom electrical installations.

**Are all shower toilets wall-hung?**

No, VitrA offers both floor-standing and wall-hung options.

**I have a limited budget which is the best shower toilet for me?**

VitrA's Aquacare is the perfect choice for those working to a tight budget. The unit includes washing with water but does not require an electrical connection. It can be installed just like a standard WC which offers savings on labour costs too.

**Money is no object, which shower toilet is the most luxurious?**

The streamlined V-Care Prime is the top of the range shower WC from VitrA. Features include oscillating and pulsating jet washing options, adjustable drying temperature, five-seat temperature options, automatic purification, remote operation, a stylish and reassuring light for night use, remote seat opening and closing and many more features besides.

V-Care Prime, Rim-ex, wall-hung WC pan, 54cm, hidden fixation, White £3,248 (7231B403-6216)

233

# V-Care

Our latest generation of V-Care shower toilets combine smart technology with the personal hygiene benefits of a bidet.

There are three options to choose from, all featuring Rim-ex technology (see page 240):

### V-Care Prime

The Prime model raises the standard in terms of features and for the ultimate convenience there is a wall-hung option and a floor-standing version perfect for a retrofit solution. The stylish design complements any bathroom style and the sensor light provides ambient light within the bathroom, perfect for night time visits to the bathroom. There is a full range of cleaning options, including a gentle front cleaning function for women. Heated seat, variable wash settings and drying options are included for the ultimate personalised washing experience.

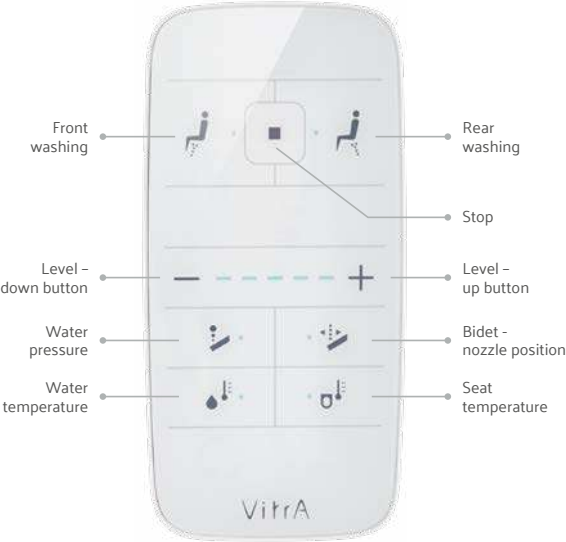

### V-Care Comfort

The mid-range option, with the female and male wash function is perfect for families. Auto open and close seat is included as well as variable washing and drying options. Air deodorising is also included.

### V-Care Essential

Entry level option but still with plenty of features to meet the cleaning needs of most people. If you don't want the drying option this is the choice for you.

All the V-Care WCs are controlled using a stylish remote control and VitrA Prime can also be used using the app, so the wash experience can be pre programmed.

Below is an easy to use comparison table:

	V-Care Prime	V-Care Comfort	V-Care Essential
Wall-hung installation	●	●	●
Floor-standing installation	●		
Sensor, ambient lighting	●

# Aquacare shower toilet

Developed by the VitrA Design and Innovation Team, Aquacare is a bidet and toilet in one, offering a refreshing, clean and hygienic bathroom experience. No electrical connections are required as the water is controlled via standard plumbing methods.

The Integra, Sento and M-Line Aquacare toilets feature soft-closing seats and our hygienic Rim-ex design (see page 240), and can also be used with the Vitrus cistern (see page 242).

When installing an Aquacare WC there is no additional equipment or preparation required for installation.

There is also a choice of WC shape to ensure it will blend with any bathroom design. The mixer tap can either be wall-mounted or integrated into the WC design for the ultimate in choice and flexibility.

Detail of the integrated air breaker

## Increased hygiene

Aquacare WCs feature a non-return valve providing an air break to prevent contaminated water from the pan travelling back through the system. Fully compatible with the EN1717 regulation which protects against the pollution of drinking water.

## Beautifully designed

The Aquacare technology is hidden within the pan so it looks like a regular toilet and will integrate with any bathroom design. A soft-close seat is included with all models. Rim-ex technology is also included as standard making the toilet more hygienic and easier to clean.

## Thermostatic control

The M-Line and Sento Aquacare toilets offer a thermostatic feature to ensure a consistent water temperature, to a maximum of 38° temperature. This is controlled via a mixer valve mounted on the side of the toilet.

## Features and benefits

- Styles available:
  - Sento Aquacare
  - M-Line Aquacare
  - Integra Aquacare
  - Choice of controller location; either wall-mounted or integrated into the WC design (except Integra)
- Wall-hung
- Rim-ex toilet design
- Soft-close seat
- Simple to install

## Quick and easy to install

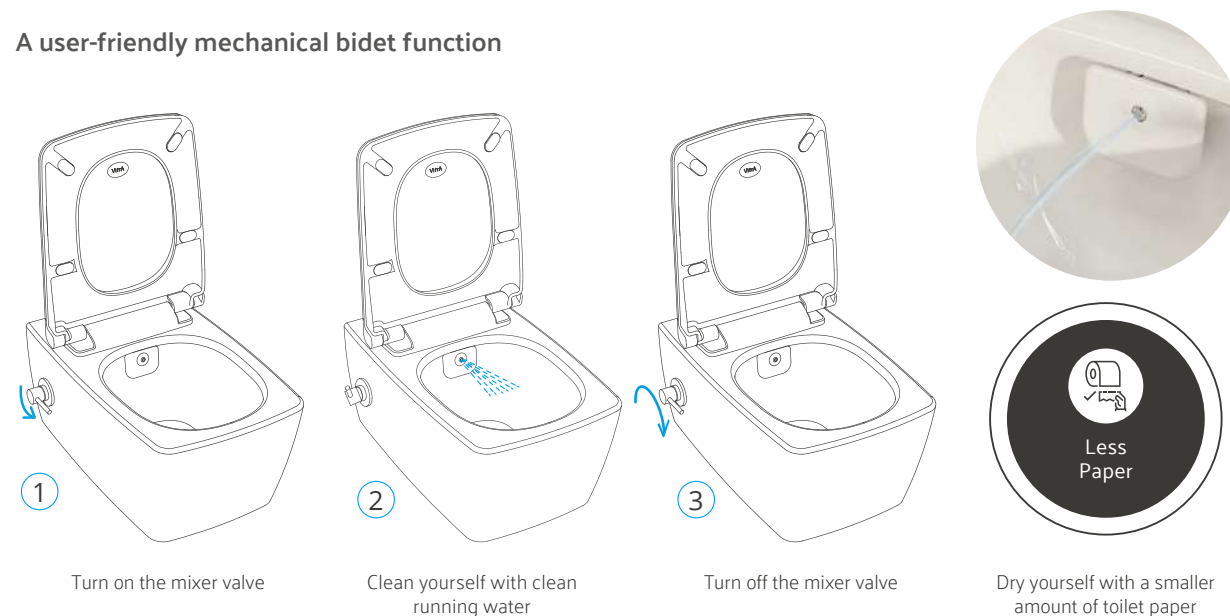

Aquacare comes as a complete set. Included is a toilet with a pre-assembled and integrated air breaker and a soft-closing seat. No additional equipment or preparations besides water installation are required.

If maintenance is required, access is easy. One simple click removes the Aquacare cover located below the toilet seat.

M-Line Aquacare wall-hung WC pan E907 (7672B003-6204)

## A user-friendly mechanical bidet function

Available with an integrated or wall-mounted mixer valve.

# Rim-ex

Rim-ex harnesses the latest in toilet bowl design. With a rimless, smooth internal pan that eliminates anywhere for germs and dirt to accumulate, the toilet that stays cleaner for longer and actively resists dirt build up.

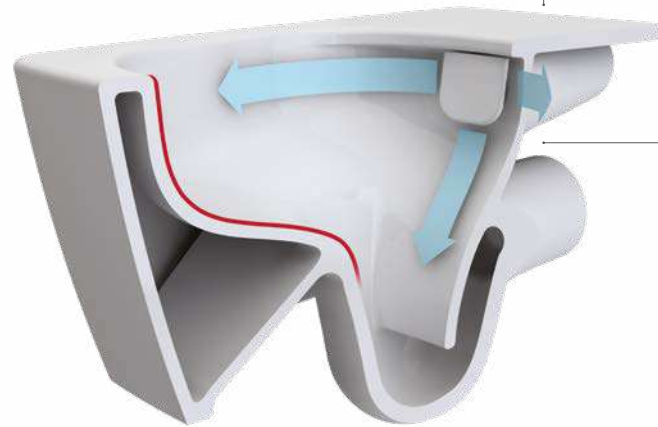

Tests prove Rim-ex is 95% more hygienic than standard toilet pans\* and it is much easier to clean – as there are no ledges you have complete visibility of the bowl. The unique design of the pan incorporates a water diverter to direct the flush around the bowl, which is easily removed for cleaning.

**RIM-EX™**  
WC pan

**95%**

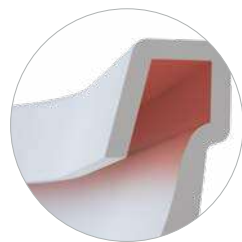

more hygienic than  
standard toilet pans.\*

Easy-to-clean  
rimless bowl  
discourages germ  
reproduction.

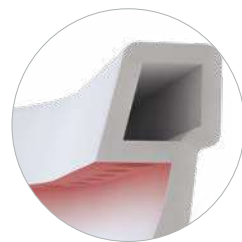

A specially engineered  
water diverter  
located at the back of  
the toilet flushes water  
around the whole pan for  
improved cleaning.

# Smart Panel

Using the latest digital sensor technology we've created the most hygienic and efficient toilet flush available.

As the digital home evolves, VitrA has combined smart technology with water-saving design in a modern and elegant flush plate that is compatible with VitrA 742 and 748 frames.

## V-Care Smart Panel app

The Smart Panel system can be synced to the owner's mobile phone through VitrA's app, allowing the user to flush and view usage data for their toilet remotely. The app's regular reporting allows households to see their weekly water usage and identify how they can be more efficient.

## Flush with success

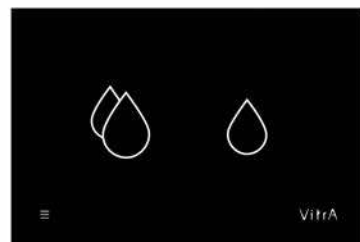

VitrA's Smart Panel has three flushing options – a full flush, half flush and a periodic flush – allowing the user to have control over water usage. Designed with hygiene in mind, the new periodic flush mode can be set to regularly wash out the bowl, minimising the risk of dirt and stains accumulating, keeping waste pipes clean.

## Family-friendly features

For families, the smart flush plate can be locked as a safety precaution for children.

Easy-clean, durable glass panel, in high gloss black.

# Frames for wall-hung WCs

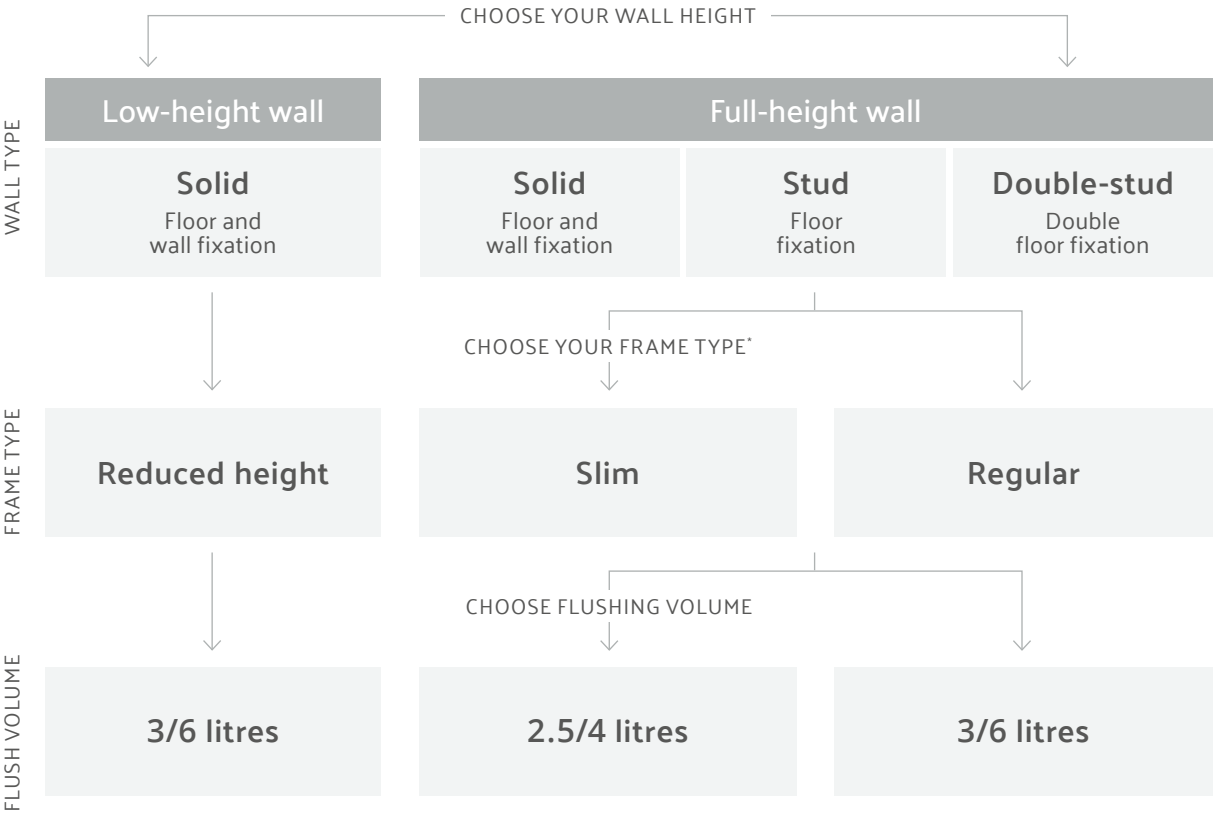

VitrA’s frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in place without the need for expensive structural building work.

Whatever your project needs, VitrA’s range of frames offers you complete flexibility. The reduced height frame is perfect when space is at a premium or the room has a sloping roof or low window. Both the slim and regular-sized frames can be used in solid, stud and double-stud wall scenarios and are both available with a choice of flushing volumes.

For technical specifications on all products, please visit [vitra.co.uk](http://vitra.co.uk)

250

\*Check against our full range of wall-hung frames for WCs, urinals, bidets and washbasins at [vitra.co.uk](http://vitra.co.uk)

Need an alternative to a wall-hung frame? Our Vitrus glass concealed cisterns (page 242) for wall-hung and back-to-wall WCs can be used with any wall type, removing the need to create a false wall to hide the frame.

# Sustainability & accreditations

We're driven by our commitment to a sustainable future and the efficient use of water is one of our top priorities. We recognise our responsibility as a leading manufacturer of bathroom products to spearhead the water-saving movement having achieved the target set of reducing our own water consumption by 4% between 2017 and 2020.

We are also devoted to developing products and technologies that enable our customers to save water in their own homes. From aerators to eco-friendly cartridges, our innovative water-saving features mean you can save water while not compromising on design.

## European Water Label

The European Water Label empowers consumers with important information on the water and energy use of bathroom products. With sustainability at our core, the vast majority of our products fall under the top water consumption band (Class A, using 5 litres or less of water).

## Unified Water Label

Throughout this brochure, VitrA mixers that are certified by the Unified Water Label are indicated by this icon, which can reduce water usage by 60%, even at the lowest consumption rate (5 litres/minute).

With a heat regulator, flowrate control and an exclusive flow regulator, the basin mixer cartridge allows for additional water and energy savings. Our natural resources can be conserved when we control the amount of water and energy we use.

## WRAS

WRAS (Water Regulations Advisory Scheme) has been approved as compliant with the Water Supply (Water Fittings) Regulations and Scottish Byelaws. All WRAS-approved products undergo rigorous mechanical and water quality testing that ensures the product will keep water supply clean and free from contamination.

To see the full list of our WRAS-approved products, please visit [vitra.co.uk/about-us/sustainability](https://vitra.co.uk/about-us/sustainability)

## Adjustable cartridges

Some of our mixers come with adjustable cartridges that limit the maximum heat and flow from the tap, which in turn can save up to 60% waste. Our water- and energy-saving products are marked throughout with these symbols.

Water-saving

Energy-saving

## Aerators

Aerators sit at the end of taps and add streams of air into the water flow. Water-saving and energy-saving, aerators significantly reduce the amount of water used while maintaining high water pressure. By directing water into one single downward flow, aerators also create a smoother flow and reduce splashing. Our ranges with aerators are marked throughout with the following symbols.

Water-saving aerator

Swivel aerator

Coin-slot aerator

Water-saving aerators use significantly less water while maintaining a strong flow of 5 litres per minute.

Swivel aerators can easily be angled to reach all corners of the washbasin, allowing you to change the direction of the water flow.

Coin slot aerators can be conveniently removed with a coin, making them easy to clean.

## Water pressures

It's important to understand the water pressure in your plumbing system when choosing your brassware. Whether it's a gravity, combination boiler, pump assisted or mains high pressure (ask your installer if you're unsure), knowing your system will help you find the best product.

The minimum water pressure requirements for each product are marked in the brochure. Most products will suit any water system, however the high pressure products are designed to work with high pressure systems for maximum pressure. Equally, if you have low water pressure, there are lots of products that will work for you.

Low (0.4 bar)

Medium (0.4-1.0 bar)

High (above 1.0 bar)

# Blue Life

Evolution depends on being adaptable to change. As the climate and the needs of our clients change, our ethos as a company evolves. In 2017, we initiated Blue Life, our pledge to greener production.

Since the Blue Life initiative began, we are now using 35% less water than before and have reduced energy consumption in our ceramic kilns factory by 15%. But this is just the beginning of what we are striving for.

We are taking this initiative to our products. Our 2.5/4ltr WC pan has been engineered to use up to 60% less water per flush than a standard design and our brassware is manufactured with adjustable pins for you to have control over water usage.

By choosing a VitrA product, you are contributing to saving the world's natural resources.

## Our pledge to the future

- Continue the use of renewable resources in the production process.
- Develop products that promote power and resource conservation.
- Make significant investments towards boosting eco-efficiency.
