ACTING TOGETHER RESPONSIBLY FOR THE SAKE OF THE ENVIRONMENT

Luxsustainable® Bathrooms

All bathtubs, shower surfaces and washbasins are available made of climate-friendly steel under the **KALDEWEI nature protect** sub-brand.

How are the emission savings achieved?

For example, through the use of bluemint® Steel from thyssenkrupp, with which KALDEWEI heralded a new era in sanitary manufacturing. 100 percent CO₂ is saved in the steel production at thyssenkrupp. If the emissions from the upstream chain such as extraction and transport of the raw materials are taken into account, the final product has a 70% lower CO₂ footprint according to the internationally recognised Green House Gas Protocol (GHG). With nature protect, you choose the highest quality with a significantly lower CO₂ footprint. Join our path, use climate-friendly steel and receive your product certificate for the CO₂ savings achieved.

100% LUXSTAINABILITY® FOR YOUR HOME. DESIGNED AND PRODUCED RESPONSIBLY FOR OUR PLANET.

KALDEWEI

THE PURITY OF THE MATERIAL, THE NATURAL RAW
MATERIALS AND THE CAREFULLY MANUFACTURED ENAMEL
GUARANTEE THE ALMOST IMMORTAL LIFE AND THE
LASTING BEAUTY OF A KALDEWEI PREMIUM PRODUCT.

The bathroom is a special room for each of us. We can relate to ourselves in the bathroom, where we start and end the day. The element of water clears our thoughts, lets us come to rest. On average, a good hour of valuable time for each of us, every day.

Get closer to the maximum possible, every day.

Time to appreciate the bathroom even more. And spend more time in it. In every KALDEWEI surface, in every colour, in every detail of our products, you can see and feel exactly the appreciation that the bathroom deserves today.

What we do and why we do it is easy to understand. For us, quality is always synonymous with premium quality. Premium products made from the finest steel enamel. Great design, maximum comfort, smart solutions, the perfectly enamelled surface – with maximum service life.

We are guided by our own guidelines and requirements. We set the benchmarks ourselves. For our customers this means: There is premium quality in every KALDEWEI product.

We produce them 100 percent made in Germany. Directly at the company location. The entire production of shower surfaces, bathtubs and washbasins takes place on site at the headquarters. From there, no product leaves the premises until it has been thoroughly checked by human hands and eyes and finally certified before it can make its way to the customer.

After all, we are the only manufacturer in the world who has developed the formula for steel enamel ourselves. We give, and that is an integral part of our family-run company, a 30-year guarantee of trust to our valued customers* on our material. We call something like this long-term product trust. Our customers call it everlastingly beautiful and sustainably profitable.

* According to our current guarantee terms

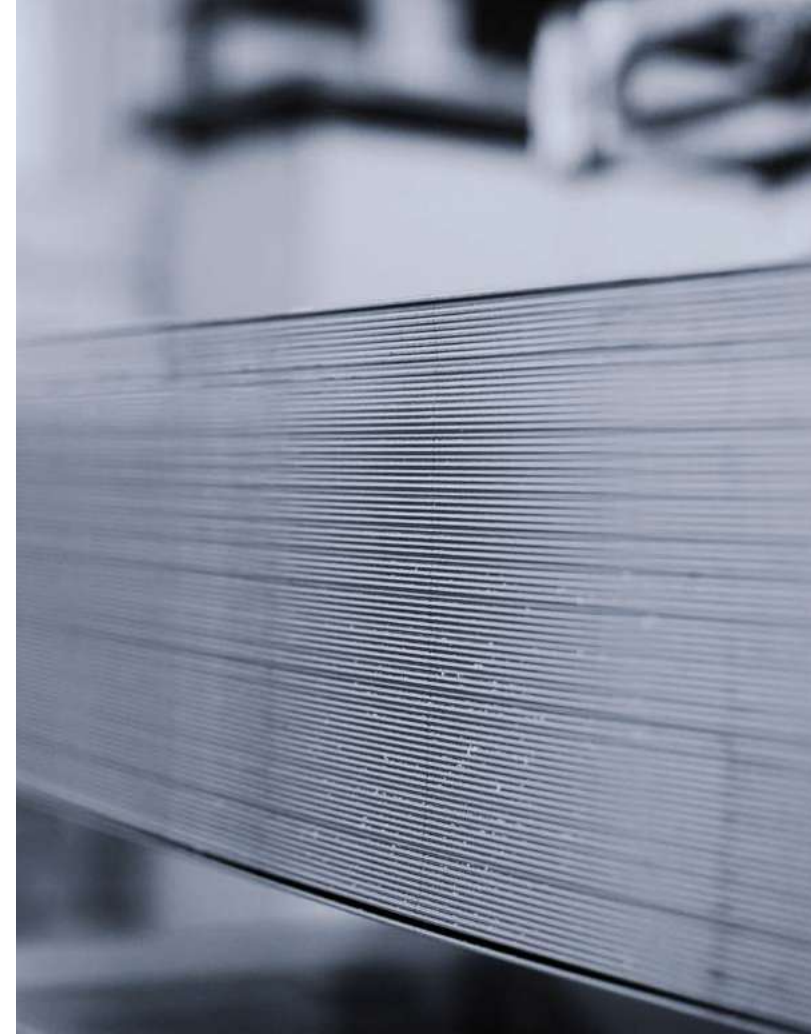

Taken from nature, given to nature.

KALDEWEI IS A MEMBER OF THE US GREEN BUILDING COUNCIL AND IS THE FIRST BATHROOM DESIGNER FROM GERMANY TO BE AWARDED BY THE INSTITUT BAUEN UND UMWELT E.V. WITH AN ENVIRONMENTAL PRODUCT DECLARATION. IN 2017 KALDEWEI RECEIVED THE "GREEN GOOD DESIGN" AWARD IN THE "PRODUCTS" CATEGORY, ONE OF THE MOST PRESTIGIOUS INTERNATIONAL SUSTAINABILITY AWARDS.

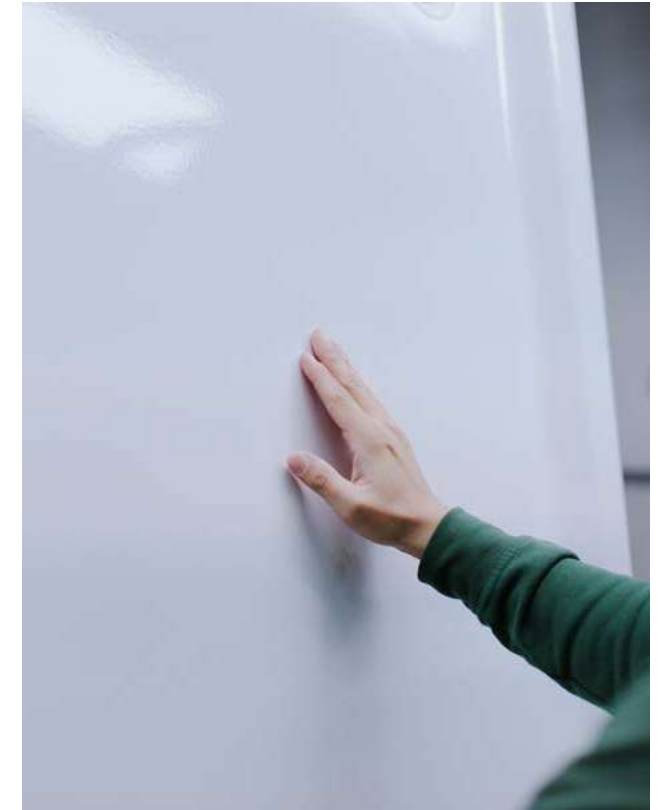

SINCE 2018 WE HAVE BEEN A PARTNER OF THE WWF – WORLD WIDE FUND FOR NATURE – AND SUPPORT A PROGRAM TO AVOID PLASTIC WASTE IN THE SEAS.

We have been sustainable for more than 100 years. KALDEWEI bathroom solutions made of steel enamel are nothing more than two absolutely pure natural raw materials that are fused together: Steel and glass. The manufacturing process is completely non-toxic. Everything happens by means of a natural reaction of the two elements by means of massive forces during the deep drawing of the blanks and the eternally binding effect of extreme heat in the furnace.

With KALDEWEI steel enamel one could also speak of an ecological "law of purity". Our shower surfaces, washbasins and bathtubs are therefore built to last for a long time. They can last for generations. They remain beautiful forever. Our actions are driven by creating products that last. We want to beautify the "bathroom experience" for decades for people who use a KALDEWEI product in the bathroom. We create values that are sustainable due to their unusually long lifespan. And 100 percent recyclable.

WE CREATE VALUES THAT ARE SUSTAINABLE DUE TO THEIR UNUSUALLY LONG LIFESPAN. AND 100 PERCENT CIRCULAR.

A PERFECTLY MANUFACTURED ENAMEL SURFACE IS LIKE GLASS, WHICH MEANS THAT IT IS MANY TIMES LESS SUSCEPTIBLE TO GERMS AND PATHOGENS.

When sustainability and beauty come together.

KALDEWEI steel enamel is 100 percent recyclable and practically invincible. Daily stresses on the material and design such as water, cleaning agents, alkalis, or simply dirt damage surfaces in the bathroom.

Our steel enamel stays like new for decades. The surfaces are scratch and impact resistant, heat resistant, remain colourfast even after decades, are timelessly beautiful and robust. Steel enamel is easy to care for like no other material in the bathroom. This makes it as sterile and hygienic as possible because nothing sticks to it. And to ensure it stays that way, we have been continuously expanding our material expertise for four generations and continue to research even better solutions every day.

Pore-free hygiene in sensitive wet areas.

When it comes to bathroom hygiene, steel enamel is the gold standard. This is because germs do not like smooth, pore-free surfaces. Every bathroom is a sensitive hygiene area due to the widely varying temperatures and high humidity.

In less durable and more open materials, such as tiled shower surfaces and their joints, scratches and cracks form gradually, in which uninvited, microscopic guests can nestle. And stay there too. A fully enamelled shower surface, on the other hand, is closed, so dirt simply flows off. For both hygienic and aesthetic reasons, a seamless shower surface made of steel enamel has long since overcome the tile. COORDINATED COLOURS COLLECTION

Perfectly matched to the current tile trends.

EXCLUSIV COLORS
EXPRESSIVE COLOURS THAT MATCH THE COLOUR TRENDS ON THE MARKET.

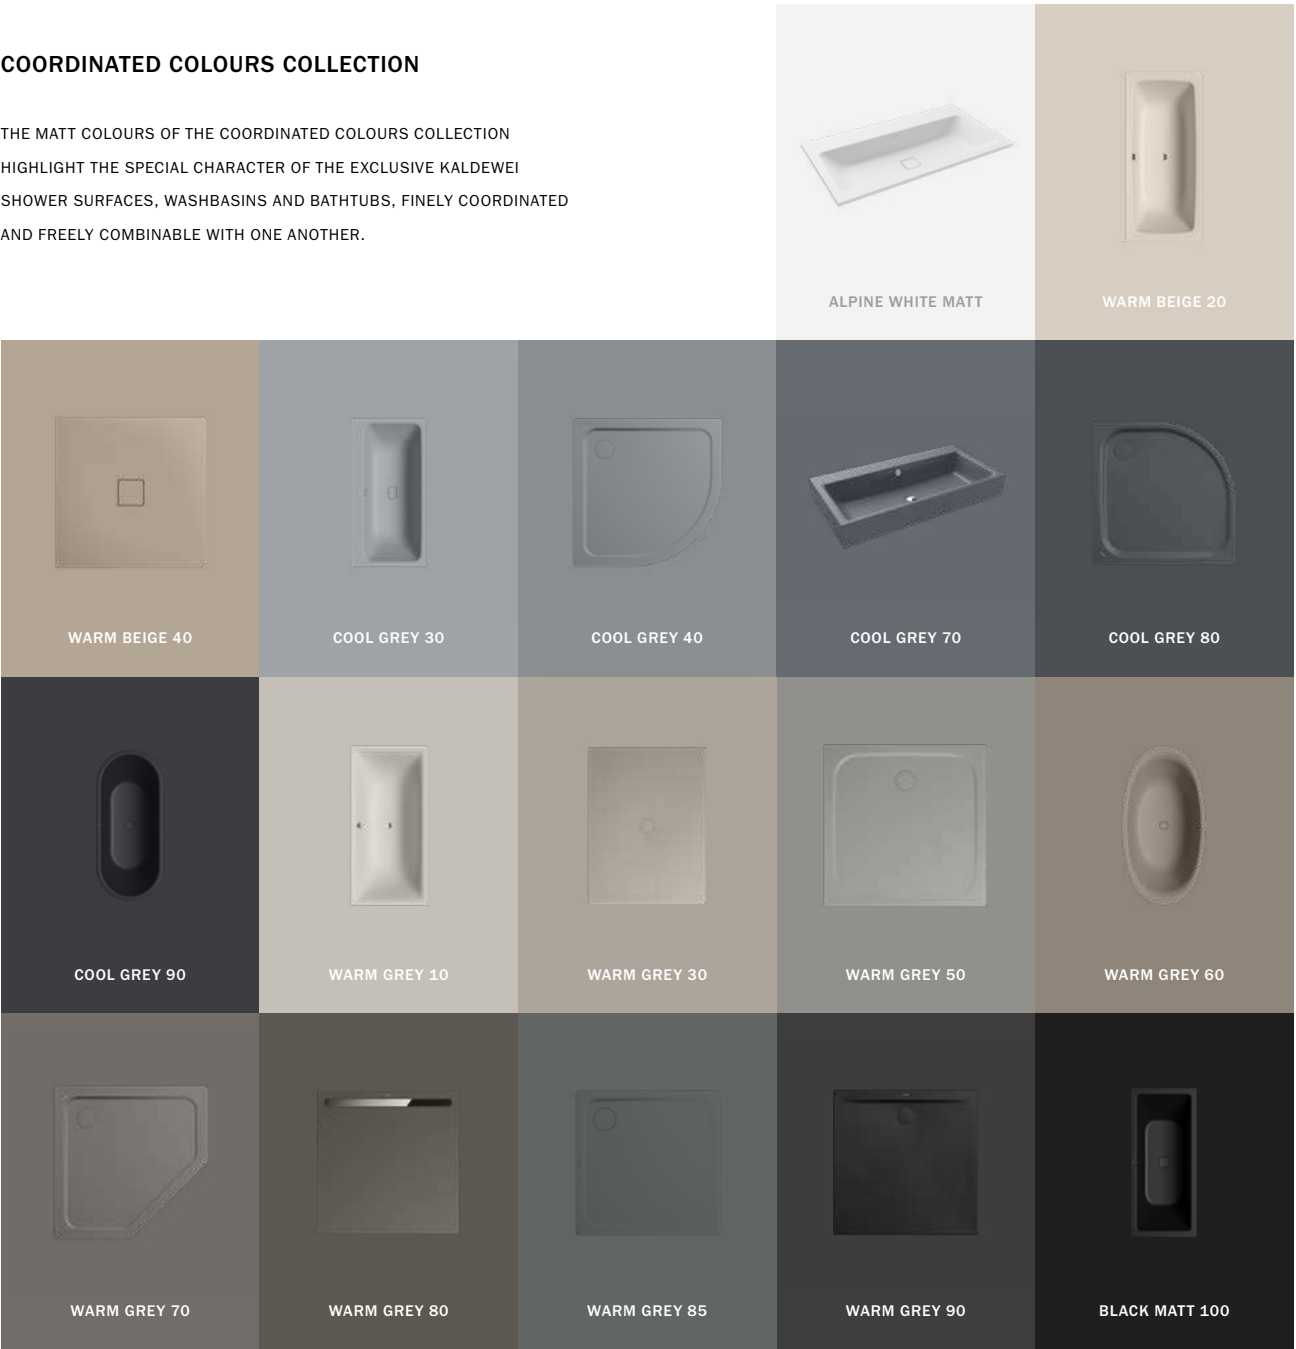

With our EXCLUSIV COLORS the MIENA washbowl (p. 66) becomes a real highlight in the bathroom. We designed the four colours especially for MIENA, which is characterised by an unpretentious, timeless elegance. This elegant, modern creation of a washbasin allows room to play with colours and turns the bathroom into a cosy space as a place of retreat.

SANITARY COLOURS

COORDINATED COLOURS COLLECTION

THE MATT COLOURS OF THE COORDINATED COLOURS COLLECTION HIGHLIGHT THE SPECIAL CHARACTER OF THE EXCLUSIVE KALDEWEI SHOWER SURFACES, WASHBASINS AND BATHTUBS, FINELY COORDINATED AND FREELY COMBINABLE WITH ONE ANOTHER.

“After having a bath, body lotion is no longer required as the skin is less dry.”

“Millions of micro-fine air bubbles to stimulate the skin cells.”

* This is what users say.

SKIN TOUCH

Transform your bathroom into the perfect beauty oasis.

SKIN TOUCH enriches the water with millions of micro sized air bubbles that are up to 100 times smaller than those of whirl systems. The bubbles are evenly distributed in the water and form a gently pearling mixture of air and water. This stimulates the skin cells, gently cleanses them and makes them noticeably smoother. A care effect that can be continued as often as required with each subsequent bath.

And with the SKIN TOUCH EMOTION function, you can finally round off the sensual bathing experience with atmospheric spectral light. That is the most elevated KALDEWEI pleasure of bathing and operating comfort.

PRODUCTS WITH THIS SYMBOL CAN
BE EQUIPPED WITH SKIN TOUCH.

A revolutionary audio system in the KALDEWEI bathtub lets you bathe in sound! The tub becomes a refined speaker that lets you experience your music collection from your smartphone, laptop or tablet in a completely new way.

PRODUCTS WITH THIS SYMBOL CAN
BE EQUIPPED WITH SOUND WAVE.

SOUND WAVE

With SOUND WAVE we offer you
a unique symphony in enamel both
in and under the water.

FREE-STANDING BATHTUBS & SHOWER SURFACES WITH WASTE CHANNEL

19

The bathtubs in the exclusive KALDEWEI product line – fully enamelled, seamless, made from one piece – are wellness icons and are already an absolute design classic. Solitary, sublime, these elegant bathtubs represent a new era. Breathtakingly beautiful and a confident statement in the centre of the bathroom. And a true masterpiece in the discipline of manufacturing the high quality steel enamel. The glass-fused enamelled surface of this bathtub series is masterfully crafted and no joint detracts from bathing enjoyment.

In the sophisticated hotel sector, in exclusive residential construction or in the private designing of a dream bathroom, this line literally opens up a world of possibilities. For a newly conceived, spacious bathroom architecture that gives people the space and comfort they need to feel with all their senses.

Get to know our bi-colour bathtubs and be inspired by the variety and combination options.

Our iconic statement
in the bathroom:
luxurious bathing pleasure
with 100% sustainability.

FOREVER YOUNG AND CLASSIC AT THE SAME TIME. THE FREE-STANDING AND MASTERFULLY CRAFTED BATHTUBS FROM KALDEWEI. WITH DIMENSIONS OF UP TO 180 CM BY 80 CM AND A BATH DEPTH OF UP TO 46 CM, GENEROUS ENOUGH FOR A RELAXING BATH FOR TWO.

MEISTERSTÜCK CENTRO DUO OVAL[®]

Designed by KALDEWEI

Minimalism and pure elegance are the hallmarks of this bathtub family. The oval shape, the special depth of 46cm as well as the two identical backrests and central waste outlet ensure that two people can bathe in an extremely pleasant and comfortable way.

MEISTERSTÜCK OYO DUO

Design by Stefan Diez

FREE-STANDING

COLOUR BLACK MATT 100

The KALDEWEI MEISTERSTÜCK OYO DUO is a masterpiece of German engineering, in an unprecedented egg shape made of steel enamel. With this free-standing bathtub, Stefan Diez has created a graceful design sculpture that integrates harmoniously into the bathroom space, flowing and almost floating. Inspired by Japanese porcelain design, the double-walled product impresses with its minimal organic lines and elegant functionality.

Thanks to KALDEWEI's many years of experience, the interior shape of the KALDEWEI MEISTERSTÜCK OYO DUO offers maximum lying comfort and at the same time the possibility of using water as a resource in an environmentally friendly way. Its exterior shape follows the idea of elegance, lightness and naturalness. The design gives the impression of a free-flowing form that has just touched down, appears to be floating and is calmly still.

FREE-STANDING

L 1730	W 820	D 419

COLOURS

Photographer and rock star
Bryan Adams has photographed
for KALDEWEI for the third time
and completes the trilogy of
bathroom staging.

KALDEWEI's collaboration with the Canadian rock musician
and internationally acclaimed photographer Bryan Adams is
entering its third phase.

The new campaign impressively puts the free-standing
MEISTERSTÜCK OYO DUO bathtub on centre stage.

Bryan Adams shoots from a distant perspective so that
the model's entire body is never visible. This seeks to
give the impression that the bare arms and back merge
with the bathtub in a luxurious yet intimate spa moment.
The claim of the campaign "Enveloped in sustainable
luxury" not only refers to the perfect me-time, but also,
with the new motifs of the OYO DUO, to the completion of
the Kaldewei trilogy of washing, showering and bathing.

KALDEWEI Click'n Clean®

The innovation for cleanliness in the bathroom.

KALDEWEI designers in Ahlen, Westphalia have developed a cutting-edge opening mechanism, which can be operated with a flick of the wrist without any additional tools. This makes cleaning much simpler, faster and more user-friendly than any shower channel before.

The revolutionary shower profile was developed to live up to the highest requirements. The KALDEWEI FLOW gives an exclusive touch to all shower floors.

With the patent-pending KALDEWEI Click'n Clean® mechanism, the cover can be simply opened and cleaning is child's play.

NEXSYS®

NEXSYS is a floor-level, barrier-free little revolution in the shower. Great design and the art of engineering meet functional simplicity with the installation. Numerous design options for your sophisticated bathroom.

AVANTGARDE

49

This line represents uncompromising design in the bathroom. Bathroom design in combination with pioneering product ideas that bring together outstanding design objects in the bathroom with ready-to-install smart systems.

For example, the further development of the term “wash basin” in the form of a bowl with generous interior depth and made of filigree, thin-walled steel enamel. A washbasin that almost seems to float in space. Or the shower surface revolution: a one-piece, floor-level standing area, elegant and perfect.

The idea behind this product line creates space for new design-oriented aesthetics in the bathroom, orderly and clear, for considerable comfort and freedom of movement. A simple design language, derived from the puristic basic shapes of the circle and square.

ASYMMETRIC DUO

Designed by Phoenix Design

A bathtub with a comfort zone: With its generously dimensioned shelf space, the ASYMMETRIC DUO also has a spatial dimension. You can sit on it or set down bathroom accessories. It is also used for the individual placement of fittings. The contrast between the precise and clear shape of the bathtub rim and the ergonomic and flowing design of the interior is appealing. In addition, the waste flush with the bottom of the bathtub forms an elegant and harmonious solution.

AVELLINO

Designed by KALDEWEI

The AVELLINO washbowl defines elegance in a new way. A slender silhouette gives it a delicate, almost floating lightness. This modern design principle goes beyond the mere exterior and not only creates a harmonious atmosphere in the room, but also ensures optimum comfort and hygiene thanks to the closed glass surface. Made from sustainable steel enamel, AVELLINO not only meets the highest demands in terms of aesthetics, but also focuses on longevity and circularity. This washbowl is an eye-catcher for both private bathrooms and excellent hotel bathrooms, where design, quality and functionality go hand in hand. AVELLINO is available in three sizes.

Immerse yourself in the world of elegant bathrooms. AVELLINO – for modern design and timeless beauty in every bathroom.

COUNTERTOP HANDBASIN
(BLACK MATT 100)

The relationship with the bathtubs and shower surfaces of the CONO family is unmistakable: Manufactured in precious KALDEWEI steel enamel, these washbasins combine aesthetics and user friendliness in an ideal symbiosis between clarity and calm. The square enamelled waste underlines the basic geometry of this perfectly shaped washbasin. The overflow is invisibly integrated in the waste - no overflow hole disturbs the clear design. The CONO washbasin radiates elegance and harmony in perfection.

CENTRO

Designed by Anke Salomon

The purism and the simple elegance of the CENTRO bathtub family have been transferred here to washbasins. With the circle as the basic idea, a very special geometry was created – with soft radii and clear contours. In addition to the round enamelled waste cover and the invisible overflow, the generously dimensioned shelf area is particularly striking. It gives the washbasin its own character, which comes into its own in a modern bathroom environment as well as in a traditional interior – regardless of which tap you choose.

NATURAL UNION

Bryan Adams stages washbowls made of steel enamel.

DEEP DREAM

NAVYBLUE MATT

SOFT TOUCH

SWEET LOVE

With his pictures the legendary musician and photographer sends out a signal for connectedness and an awareness of hygiene in these turbulent times. With great attention to detail Adams gives KALDEWEI an intimate view of being together in the future: with simple hygiene measures we extend our hands to each other – to our family, our friends and our partners.

The inspiration for “Naturally Connected” comes from steel enamel, the material KALDEWEI has been using for over 100 years to produce its sustainable bathroom solutions. Glass and steel – two authentic, natural materials with unique properties enter into an indissoluble union.

“WE ARE ALL CONNECTED WITH EACH OTHER IN A NATURAL WAY AND WE HAVE A RESPONSIBILITY TO BE CONSIDERATE OF EACH OTHER AND OUR ENVIRONMENT – EVERYDAY GESTURES, SUCH AS WASHING OUR HANDS, ARE BECOMING MORE IMPORTANT THAN EVER BEFORE.” BRYAN ADAMS

PHOTOGRAPHER
BRYAN ADAMS

NUEVA

Designed by Werner Aisslinger, Studio Aisslinger

The Nueva captivates with its clear, elementary form as the antithesis to an increasingly complex world. The concise offset in the contour of the new design gives the bowl a calm precision that predestines it to become the classic of tomorrow. The unique design of the bowl is accentuated especially in the interplay with the cubic characteristics of the room architecture. Made from sustainable steel enamel and designed to meet high demands, the NUEVA is suitable for luxury hotel bathrooms and wellness areas as well as for exclusive private bathrooms and public areas.

AMBIENTE

75

We asked ourselves the question – what does the ideal ambience for a family bathroom look like? Children and adults have different needs in the bathroom. The result is a product concept that combines variable solutions with sophisticated and, above all, user-friendly design.

The variety of products is therefore broad and scalable. For the objects in this line this means: Generous standing areas in the shower for a lot of freedom of movement. Robust and easy-to-clean surfaces in the bathtub, washbasin and shower. High level of comfort thanks to the Antislip Secure Plus enamelling applied over the entire surface – almost invisible to the eye, but noticeably slip-resistant.

Here private households of all sizes will find the perfect design with which they can express their lifestyle individually. A collection as powerful as you are.

PURO, PURO DUO & PURO SET WIDE

Designed by KALDEWEI

PURO
Reduction of the elements to the essentials. One of the basic principles of modern bathroom architecture. Clear, subtle design, that is PURO bathtub design. As a single-seater bathtub, it fulfils the desire for high-quality and affordable design. With a generous floor length, the PURO bathtub offers exceptional bathing comfort.

PURO DUO
The puristic design of the PURO DUO bathtub follows the principle of reduction and is the logical extension of the successful PURO bathtub range. PURO fulfils the desire for high quality and timeless design for bathing for two.

PURO SET WIDE
PURO SET WIDE combines bathing and showering at the same time in one and the same bathtub in a completely new way. The centrally placed waste and overflow not only enhance the appearance of the bathtub, but also provide extra freedom of movement when showering. The lower bathtub height makes getting in and out very easy and reduces water consumption when bathing.

DYNA SET & CLASSIC DUO

Designed by Sottsass Associati*

DYNA SET

The classic DYNA square bathtubs offer everything you need for relaxed bathing. Even the basic shape of the DYNA single-seater provides a large amount of space thanks to its pleasantly wide sloping back and, thanks to the tapering inner shape, also ensures sustainable, economical water consumption.

CLASSIC DUO

The CLASSIC DUO bathtubs shine with their timeless, balanced shape. As reduced as necessary, as comfortable as possible. Thanks to two identical back rests, the inner shape invites two people to bathe comfortably.

THANKS TO THE UNIQUE MATERIAL KALDEWEI STEEL ENAMEL, THE SURFACE OF OUR PRODUCTS IS COLOURFAST AND LIGHTFAST, DOES NOT YELLOW AND PERMANENTLY RETAINS ITS ORIGINAL COLOUR.

SUPERPLAN ZERO

Designed by Werner Aisslinger, Studio Aisslinger

The SUPERPLAN ZERO is a floor-level masterpiece made of sustainable steel enamel. The step-free access and the extremely precise corner radii allow the elegant shower surface to shine alongside the tiles. An extra-generous standing area with a barely perceptible slope and the waste close to the wall guarantee a special showering pleasure.

In addition, the extensive range of dimensions and colours fulfil almost all design and personalisation requests. Professionals are also completely convinced thanks to the time-saving installation with the KALDEWEI installation systems and the low installation height – even for large-format showers. Let yourself be inspired!

PRECISION AND ELEGANCE

Bryan Adams stages the new
SUPERPLAN ZERO shower floor
impressively.

PHOTOGRAPHER Bryan Adams

COLOUR COOL GREY 70

KALDEWEI has teamed up with Bryan Adams for the second time. The photographer succeeds in capturing aesthetic movements in a unique way on a "stage" made of steel enamel. For his exciting pictures he works with personalities from the world of ballet. The dance form is considered one of the toughest disciplines in the world and it takes years before the steps and poses can be performed precisely and elegantly. Therefore, it was a meeting between like-minded people. The dedication to detail and perfection plays a central role from the idea stage to market readiness, and it is also the case for the creation of bathroom objects made of steel enamel.

"IT WAS A GREAT PLEASURE
TO COLLABORATE AGAIN WITH KALDEWEI,
WHERE I CAPTURED THE ELEGANCE OF
BALLET DANCERS ON A UNIQUE STAGE."

THAT IS WHAT THE CANADIAN PHOTOGRAPHER AND
MUSICIAN COMMENTED ABOUT THE WORK FOR KALDEWEI.

PHOTOGRAPHER
BRYAN ADAMS

SUPERPLAN^{NEW}

Designed by KALDEWEI

SUPERPLAN – Proved a million times over and now with a new look for today’s bathrooms. After the current facelift of what was once the first floor-level KALDEWEI shower surface, the fresh design takes the classic SUPERPLAN to a new level. As the saying goes, making the best even better. More precise edges, sharp corner radii and clear lines give the shower a modern appearance.

While the corner waste offers a high degree of flexibility in terms of positioning across all models and dimensions, the revised edge area allows for a generous standing area throughout as well as an increased area of movement.

CORNEZZA & ARRONDO

Designed by Phoenix Design

CORNEZZA
Courage in the corner. The CORNEZZA shower surface was created with this in mind. Clear lines for pure shower pleasure in every corner. Large standing area for a lot of freedom of movement with floor-level installation for more elegance and above all comfort in large or small bathrooms.

ARRONDO
Circle and square. The ARRONDO has a fine sense of proportions and aesthetics. The quad shower surface impresses with a minimalist design language based on the dialogue between circle and square. The ARRONDO offers a surprisingly large standing area for plenty of room to move. ARRONDO is available in four dimensions and, on request, with moulded panelling.

* With moulded panelling for D = 65mm.

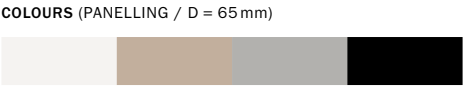

KALDEWEI STEEL ENAMEL COMBINES THE INHERENT PROPERTIES OF STEEL AND GLASS, MAKING IT HIGHLY RESISTANT TO MECHANICAL STRESS.

“Hygge” is the new cocooning. A valuable, warm feeling of security and comfort. It often does not take that much. Good ideas and a pleasing design mean maximum freedom of movement even when space is limited. The shape is clear and well-founded. It fits into the room and lets it live.

It offers smart and creative solutions and adapts to the conditions of the architecture. With clear shapes and simple designs, with sophisticated constructions that create a lot of space in a small area. With a value-adding character and the use of premium quality steel enamel at economic prices.

Advantage is quality and function that make every bathroom higher quality, more harmonious and more hygienic.

CAYONO DUO

Designed by KALDEWEI

The CAYONO DUO is the first KALDEWEI duo bath in the ADVANTAGE segment and offers an attractive solution for relaxed bathing for two. The CAYONO DUO impresses with considerable space, comfort and a spacious interior. CAYONO bathtubs, together with CAYONOPLAN showers and CAYONO washbasins, set the new standard in family bathrooms.

THE GLASS-HARD SURFACE OF KALDEWEI STEEL ENAMEL LEAVES NO PLACE FOR DIRT AND BACTERIA TO SETTLE. STEEL ENAMEL IS SUPREMELY HYGIENIC AND EASY TO CLEAN.

MINI & CAYONO

Designed by Phoenix Design*

MINI

What this bath saves in length, it makes up for in width, just where you need it most: in the shoulder area. With this special shape, the MINI offers ample freedom of movement even in the smallest bathrooms. And: Due to the tapering shape, the water consumption is significantly reduced. This one-person bath with side waste is available as either a left or right-handed model.

CAYONO

The design language of modern architecture, small corner radii and consistent geometry signal clarity and stringency. The architecture of the CAYONO bathtub was conceived for the little luxury in everyday life. Technically this means: Steep side walls create a generous bathtub interior – even with small external dimensions. The flat floor of the bathtub offers seating and secure standing for great showering.

CAYONOPLAN MULTISPACE

Colour tones that blend in with the atmosphere for floor-level showers and robust movement areas.

The CAYONOPLAN MULTISPACE now makes showers barrier-free (DIN 18040-2). According to DIN CERTCO, an impressive 60 percent* of the shower surface counts as valid movement area. This ensures space and comfort, even in smaller bathrooms.

In addition, the surface is equipped with the anti-slip function Antislip Secure Plus (rating group B, confirmed by TÜV Rheinland) as well as an effective sound insulation. For perfect standing when singing in the shower.

PREMIUM TIP

COMBINED WITH A CAYONOPLAN SHOWER AND ONE OF THE CAYONO WASH-BASINS, OUR LARGE AND SMALL CUSTOMERS HAVE THE NEW PREMIUM STANDARD WHEN IT COMES TO FAMILY BATHROOMS.

CAYONOPLAN MULTISPACE

Designed by KALDEWEI

Our new CAYONOPLAN MULTISPACE is the first DIN-CERTCO-certified shower surface with a movement area. Plan with up to 60 percent* of the shower surface as a movement area in the barrier-free bathroom. The CAYONOPLAN MULTISPACE enables barrier-free construction according to DIN 18040-2, tested by DIN CERTCO. Thanks to our intelligent frame systems, the specialist partner will save valuable time during installation and even small bathrooms can be designed in accordance with standards.

INSTALLATION TYPE		
W 1200	L 1200	D 17

* Certified by DIN CERTCO according to DIN 18040-2 (except for the R dimensions), taking into account the specifications for installation according to DIN 18040-2

CAYONOPLAN

Designed by KALDEWEI

With 22 size options, the side waste and the extra-flat tray support for easy installation, the CAYONOPLAN is always an ideal solution. With an edge height of 32 mm or 40 mm for formats with a side length of more than 120 cm, the CAYONOPLAN can be perfectly installed on tiles. Floor-level installation is also possible without any problems. As a perfect match for the CAYONO bathtub and the CAYONO washbasin, the CAYONOPLAN rounds off the bathroom design.

SUSTAINABILITY IS ALSO INTELLIGENCE IN ITS PURE FUNCTIONALITY.
OBJECTS THAT ARE TO HAVE A LONG LIFESPAN MUST ALSO BE BUILT AND
INSTALLED IN THIS WAY. MADE OF STEEL ENAMEL FROM KALDEWEI.

ZIRKON & DUSCHPLAN

Designed by Phoenix Design*

ZIRKON

Clear design, large footprint, little space required. There are many reasons to start the day with the ZIRKON. For example, the elegant quarter-circle shape, which enables intelligent installation even in the smallest of spaces. And of course that this shower tray with a waste positioned on the side is available in many sizes and several depths. Thanks to the large number of different dimensions, the ZIRKON shower tray fits easily into any room.

DUSCHPLAN

The simplest things in life are often the most refreshing. Like the DUSCHPLAN with a modern, timeless design and only 6.5 cm deep. This classic among shower trays can be easily installed in any bathroom. The DUSCHPLAN is available in a rectangular or square version.

* Only applies to DUSCHPLAN.

SANIDUSCH

Designed by Phoenix Design

With their functionalist modern design, the SANIDUSCH trays in collaboration with PHOENIX DESIGN are the game changers among shower trays. The SANIDUSCH is not only available with moulded panelling and in different depths, but also with variable width and length in rectangular or square shape. Due to the large number of different dimensions, the SANIDUSCH shower tray can be integrated into almost all room situations.

KALDEWEI STEEL ENAMEL COMBINES ROBUST STEEL AND RESILIENT GLASS TO FORM AN INSEPARABLE BOND HARNESSING THE STRENGTHS OF EACH MATERIAL IN PERFECT SYMBIOSIS.

CAYONO

Designed by KALDEWEI

The CAYONO washbasin combines puristic aesthetics with intelligent function: Developed for the design of modern bathrooms, the washbasin impresses with its clear lines, which are rounded off by softly curved contours. Combined with the generous interior depth of the washbasin, the result is comfortable space that is an experience for every user. This washbasin is completed with the overflow mirrored to the inside of the room, which enables a consistently harmonious look. Thanks to its uniquely natural design, CAYONO can be used in a wide variety of projects.

OBJECT Q & OBJECT R

Designed by KALDEWEI

OBJECT Q

The OBJECT Q built-in washbasin is a convincing solution for everyone who wants to see timeless elegance and intelligent functionality combined. The classic, rectangular shape with the generous yet softly flowing inner contour gives OBJECT Q its stylish character. OBJECT Q works perfectly in combination with a wide variety of countertop materials, and the all-round installation edge enables special perfection when built in.

OBJECT R

The built-in washbasin OBJECT R is the reliable washbasin solution for a durable wash area. The round classic combines timeless design with long-lasting quality and pragmatic functionality. OBJECT R can be used perfectly in combination with a wide variety of countertop materials. Depending on the installation solution, OBJECT R is available with enamel on one or both sides.

ANTISLIP SECURE PLUS

As a pioneer in the industry, KALDEWEI is continuously developing the material steel enamel, following the needs of our customers. Slip-resistant and safety-creating surfaces are always the focus. That is how KALDEWEI Antislip Secure Plus came about. The Anti-slip enamel applied over the entire surface is almost invisible, but still noticeable. A new creative solution and another chapter in surface finishing à la KALDEWEI.

The German technical inspection association TÜV Rhineland has certified KALDEWEI's Antislip Secure Plus as having anti-slip properties compliant with quality class B for wet barefoot areas (DIN 51097) and quality class R 10 for anti-slip characteristics in work spaces and working areas with an increased slip risk (DIN 51130). The surface itself has a subtle feel to it and comes in the refined look of the COORDINATED COLOURS COLLECTION.

ANTI-SLIP AND FULL ANTI-SLIP

INVISIBLE GRIP^{NEW}

Optimised standing safety –
for safe movement in your shower

INVISIBLE GRIP is a revolutionary surface for everyone who wants to stand safely but does not want to do without aesthetic shine in the bathroom. INVISIBLE GRIP optimises barefoot slip resistance when using soap and water. When dry, the surface appears radiantly shiny as usual and is easy to clean. When stepping on the wet enamel surface, an almost invisible micro-structure provides more grip. This beautiful solution of the refined, brilliant steel-enamel surface is available for shower surfaces and bathtubs in alpine white.

LGA Bautechnik confirms that Invisible Grip from KALDEWEI has a slip resistance of at least 24° (evaluation class C) in accordance with DIN EN 16165 – Appendix A. 30 years of slip resistance.

PRODUCTS WITH THIS SYMBOL CAN BE
EQUIPPED WITH INVISIBLE GRIP.

PEARL EFFECT SURFACES

With the Pearl effect from KALDEWEI, the water simply glides off the bathtub, shower surface or washbasin, taking almost all dirt and lime particles with it. In addition, the Pearl effect makes cleaning easier than ever:

Even dried-on water spots and lime deposits can be easily removed. And because you only need a soft, wet cloth instead of aggressive cleaners, the Pearl effect finish is clean for the environment, too. Pearl effect is a surface finish that is permanently burned into the KALDEWEI steel enamel.

It is characterised by unique durability and long life. Even with regular cleaning, the non-stick properties of the Pearl effect are guaranteed to remain unchanged for 30 years*. The Pearl effect is available for all KALDEWEI bathtubs, whirlpool bathtubs and shower surfaces and is standard on washbasins.

* According to our current guarantee terms.

KALDEWEI SPA & RELAX

RELAX LOUNGER

The KALDEWEI relax lounge consists of six elements, two of which are firmly connected to each other. This means that it can be used in three variable board arrangements. For example, as a lying board while you lie comfortably in the bathtub. Or simply as something to relax on. The three boards can also be easily connected to one another on the bathtub. This creates a large and stable storage surface that cannot slip.

MULTIFUNCTIONAL CUSHION

With the multifunctional cushion from KALDEWEI, the signs point to multi-relaxation. The cushion series can be used in three different ways: As a footrest or placed under the thighs, they prevent sliding into the water in large bathtubs. As a neck support, they provide a comfortable support for the head and neck. They serve as comfortable armrests on the inside of the bathtub.

BATH CUSHION

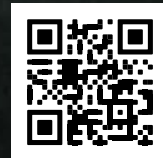

The bath cushion from KALDEWEI ensures significantly more bathing comfort. Thanks to its flexibility and soft materials, it hugs every neck and bathtub shape perfectly. Its volume can be regulated via a valve, similar to an air mattress. The skin-friendly fabric cover feels pleasantly soft and is machine washable.

BODY & SOUL

The coming together of the elements for the absolute massage experience

- Water and air combined give the entire body an intensive massage and relax the senses at the same time
- Powerful jets of water loosen muscles and joints. The side nozzles can be individually aligned to the body, special nozzles specifically treat the back and feet.
- a flow of pre-warmed air bubbles stimulates the skin
- On request, the side and floor nozzles can be selected separately and be adjusted in their intensity.
- The whirl program can be individually adjusted with the addition of water.

SOUL

A bubbling stream of air for relaxation and inner peace

- leave stress behind and free your mind
- a gentle skin massage by means of a flow of pre-warmed air bubbles
- the nerve fibre endings of the skin are stimulated by the gentle caressing of the air. This produces a feeling of floating weightlessly in the water
- the floor nozzles are particularly flat and efficient

FULL BODY

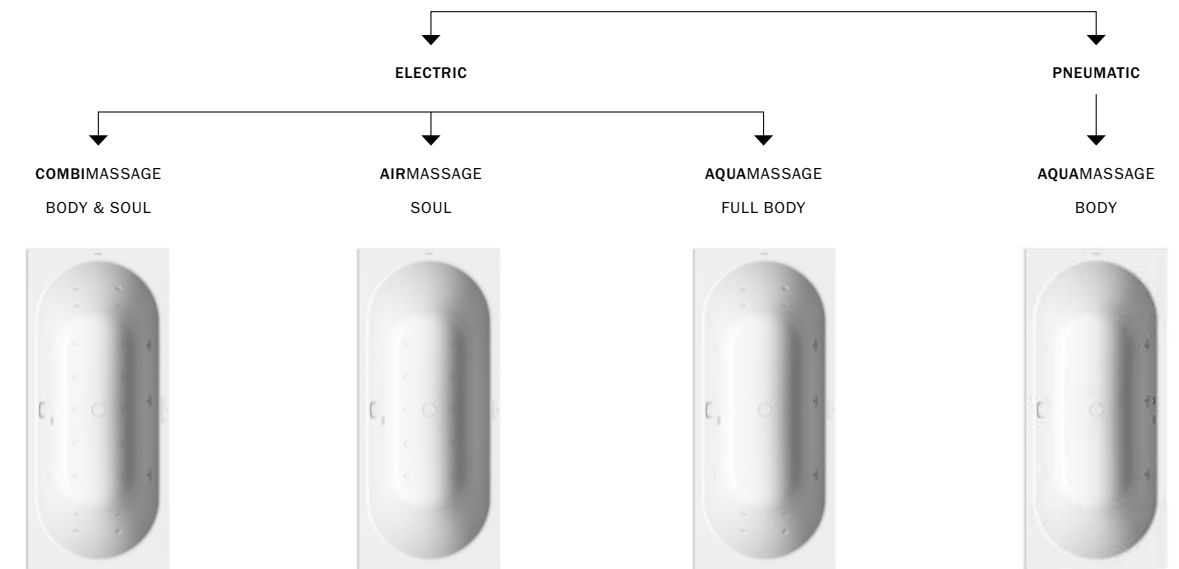

New energy with the power of water

- An intensive massage with powerful jets of water that, enriched with air, penetrate deep into the skin
- Tensions in muscles and joints are released, the connective tissue loosened and the blood circulation in the body promoted. That gives an invigorating feeling of well-being
- the side jets can be individually aligned to the regions of the body that are to be massaged
- Full body: Special nozzles treat the back and feet in a targeted way

BODY

- the side jets can be individually aligned to the regions of the body that are to be massaged

3D & BIM DATA

Our digital services support you on the way to your dream bathroom. They offer professional planning tools, support in finding and adapting products, contact details for specialist installers, the organisation of delivery dates and they enable installers to check that the product has been correctly assembled. At kaldewei.de/digitale-services.

ACTING SUSTAINABLY IS SECOND NATURE TO US.
